| <b>Learning Area:</b>       | General Mathematics                           | <b>Quarter:</b>             | 1 |
| <b>Lesson No.:</b>          | 1.1                                           | <b>Date:</b>                |   |
| <b>Lesson Title/ Topic:</b> | <b>Computing Salary, Wage, and Commission</b> |                             |   |
| <b>Name:</b>                |                                               | <b>Grade &amp; Section:</b> |   |

### Activity No. 1:

#### PRACTICING THE SKILLS ON COMPUTING SALARY, WAGE, AND COMMISSION

#### Objective(s):

In this activity you will reinforce your understanding on computing salary, wage, and commission

**Materials Needed:** pen and paper, and calculator

#### Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

1. Monthly Wage from Annual Salary (Basic)

Liza is a public-school teacher in the Philippines earning an annual salary of ₱456,000. What is her monthly salary?

2. Paolo works as a barista in a local café and earns ₱85 per hour. He works 40 hours a week. What is his weekly wage?

3. Jessa is a salesclerk earning ₱100/hour for regular time and 1.5 times the rate for overtime. She worked 48 hours this week (40 regular, 8 overtime). What is her total weekly wage?

4. Marco works as a security guard for ₱110/hour. He works 10 night shifts a week and receives a ₱30/hour night differential allowance. He works 60 hours a week. What is his total weekly wage?

5. Irene sells insurance. She earns a ₱7,000 base monthly salary plus 3% commission on total sales. This month she sold ₱500,000 worth of policies. What is her total monthly earning?
6. Rico sews face masks for a local manufacturer. He is paid ₱12 per piece. In one week, he produced 400 masks. How much did Rico earn this week?
7. Erwin works at a car dealership. He gets ₱10,000 monthly salary, 2% commission on car sales, and overtime of ₱150/hour. This month, he sold ₱800,000 worth of cars and worked 10 overtime hours. What is Erwin's total monthly income?
8. Job Offer A: ₱18,000 monthly salary, with ₱1,500 in transportation and meal allowance  
 Job Offer B: ₱20,000 monthly salary, but no allowances  
 Which job offers more take-home value, and what should the person consider aside from the pay?
9. Mara earns ₱28,000 per month. Her monthly expenses are:  
 Rent: ₱7,500  
 Food: ₱5,000  
 Utilities: ₱2,000  
 Transportation: ₱3,000  
 Other needs: ₱4,000  
 She wants to save 15% of her income.  
 Questions:  
 a. How much is left after all expenses?  
 b. Can she save 15% of her income?  
 c. What advice can you give her to meet her saving goal?
10. Job A: ₱16,000/month + ₱2,000 monthly transportation and meal allowance  
 Job B: ₱18,000/month, no allowance  
 Questions  
 a. Which job has the higher total compensation?  
 b. What other factors should be considered before choosing?

**Activity No. 2:****PROGRESS CHECKING ACTIVITY ON SALARY, WAGE, AND COMMISSION****Objective(s):**

In this activity, you will demonstrate your understanding of how to compute salary, wage, and commission based on real-life scenarios.

**Materials Needed:** pen and paper, and calculator

**Instructions:**

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer

1. Ella is a government clerk earning an annual salary of ₱360,000. What is her monthly salary?
2. Rico works as a dishwasher in a carinderia. He is paid ₱80 per hour and works 8 hours per day, 5 days a week. What is his weekly wage?
3. Nina is a fast-food crew member. She earns ₱95/hour for regular hours and ₱125/hour for overtime. This week, she worked 40 regular hours and 6 overtime hours. What is Nina's total weekly wage?
4. Benjie works as a delivery helper earning ₱400/day for 6 days/week. He also receives a ₱500 weekly food allowance. How much does Benjie earn in a week?
5. Jessa is a cellphone store salesperson. She gets a fixed monthly salary of ₱9,000 and a 5% commission on total sales. In one month, she sold ₱100,000 worth of phones. What is her total monthly income?
6. Carlo is a tailor who earns ₱20 per uniform sewn. He finished 180 uniforms this week. How much did Carlo earn?

7. Anna works as a cashier in a grocery store and is paid ₱570 per day. She works 6 days per week for 4 weeks a month. What is her total monthly wage?

8. Leo is a part-time appliance salesman. He receives a ₱7,000 base salary, a 4% commission on sales, and ₱120/hour for overtime. He sold ₱150,000 worth of appliances and worked 10 overtime hours. What is his total income?

9. Job Offer A pays ₱17,000/month with a ₱2,000 monthly transport allowance.  
Job Offer B pays ₱19,000/month with no allowance.

- a. Which job offers the higher monthly compensation?
- b. What might be other factors to consider in choosing the job?

10. May earns ₱27,000 per month. She wants to start saving. Her expenses are:  
Rent: ₱7,000 Food: ₱6,000 Transportation: ₱3,000 Utilities: ₱2,000 Miscellaneous: ₱5,000  
Questions

- a. How much will she have left after expenses?
- b. If she wants to save ₱5,000 per month, can she do it?
- c. What are ways she can reduce spending to meet her savings goal?

## V. Synthesis:

1. How will you differentiate salary, wage, and commission?

---

---

---

2. How will you compute salary, wage, and commission?

---

---

---

### LEARNING ACTIVITY SHEET

|                             |                                    |                             |   |
|-----------------------------|------------------------------------|-----------------------------|---|
| <b>Learning Area:</b>       | General Mathematics                | <b>Quarter:</b>             | 1 |
| <b>Lesson No.:</b>          | 1.2                                | <b>Date:</b>                |   |
| <b>Lesson Title/ Topic:</b> | <b>Computing Gross and Net Pay</b> |                             |   |
| <b>Name:</b>                |                                    | <b>Grade &amp; Section:</b> |   |

#### Activity No. 1: PRACTICING THE SKILLS ON COMPUTING GROSS AND NET PAY

##### Objective(s):

In this activity you will reinforce your understanding on computing gross and net pay.

**Materials Needed:** pen and paper, calculator, spreadsheet

##### Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

1. Mia is a factory worker earning ₱610 per day. She worked 20 days this month. Compute Mia's gross monthly income, estimate her SSS, PhilHealth, Pag-IBIG, and withholding tax, and determine her net pay.
2. Jacob earns ₱75/hour, worked 40 regular hours and 10 overtime hours (OT rate is 125%). Compute Jacob's gross income, apply government deductions using formulas, and find net income.
3. Carla is a government employee with a monthly salary of ₱38,150. She also pays a GSIS loan of ₱4,000/month. Compute all deductions (GSIS = 9% gov't rate used here), PhilHealth, Pag-IBIG, tax (approximate), and net pay.

4. Ariel earns a base salary of ₱10,000 and 10% commission from ₱80,000 sales. Compute gross income, estimate deductions, and get net income.

You are choosing between two job offers:

Job A: ₱25,000 salary + ₱3,000 allowance

Job B: ₱28,000 salary, no allowance

Calculate full deductions for each job and determine which gives higher net income.

5. You are choosing between two job offers:

Job A: ₱25,000 salary + ₱3,000 allowance

Job B: ₱28,000 salary, no allowance

Calculate full deductions for each job and determine which gives higher net income.

## **Activity No. 2: PROGRESS CHECKING ACTIVITY ON GROSS AND NET PAY**

### **Objective(s):**

In this activity, you will demonstrate your understanding of how to compute gross pay and net pay. You will apply your knowledge of income, deductions, and benefits by solving problems and showing complete solutions.

**Materials Needed:** pen and paper, calculator, spreadsheet

### **Instructions:**

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

Analyze solve each problem.

1. Ella works as a clerk with a daily wage of ₱570. This month, she worked only 15 days due to a family emergency. Compute her gross pay, deductions, and net pay.

2. Jayson is a technician earning ₱95/hour. He worked:

- 40 regular hours
- 5 overtime hours (paid at 125%)
- 8 holiday hours (paid at 200%)

Compute his gross income, deductions, and net pay

3. Grace has a monthly salary of ₱30,000. She also received a ₱5,000 performance bonus this month. Compute her gross income, government-mandated deductions, and net pay.

4. Nikki earns ₱20,000 base salary and receives 12% commission on ₱50,000 monthly sales. Compute total earnings, apply deductions, and determine net income

5. You are offered:

Job X: ₱22,000 monthly + ₱2,500 food allowance

Job Y: ₱25,000 monthly, no allowance

Calculate net pay of both offers and decide which is better.

**VI. Synthesis:**

3. How will you differentiate gross pay and net pay?

---

---

---

4. How will you compute gross and net pay using spreadsheet.

---

---

---

|-----------------------------|-----------------------------------------------------|-----------------------------|---|
| <b>Learning Area:</b>       | General Mathematics                                 | <b>Quarter:</b>             | 1 |
| <b>Lesson No.:</b>          | 1.3                                                 | <b>Date:</b>                |   |
| <b>Lesson Title/ Topic:</b> | <b>Application of Percentage on Various Context</b> |                             |   |
| <b>Name:</b>                |                                                     | <b>Grade &amp; Section:</b> |   |

#### Activity No. 1: PRACTICING THE SKILLS ON PERCENTAGE

##### Objective(s):

In this activity, you will reinforce your understanding of the application of percentages in various real-life contexts, such as computing discounts, markups, taxes, inflation, and profit or loss.

**Materials Needed:** pen and paper, calculator, spreadsheet

**Instructions:** Solve each problem carefully and show your complete solutions.

1. Mariel is buying the following school items at a bookstore's back-to-school sale:
  - Notebook: ₱60 (20% off)
  - Ballpen set: ₱120 (10% off)
  - Backpack: ₱850 (25% off)

Questions:

- a. Calculate the total discount for all items.
- b. Determine the final amount Mariel pays.

2. A store sells a calculator for ₱1,344, which is VAT-inclusive (12%).

Questions:

- a. What is the VAT-exclusive price of the calculator?
- b. How much VAT is included in the price?

3. Jomar bought 10 sets of pencils for ₱150 (₱15 each). He planned to sell each set at ₱20, but to sell faster, he reduced the price to ₱13.

Questions:

- Calculate his total sales.
- Did he gain or lose money? By how much (absolute and percentage)?
- What should the selling price have been to earn a 30% profit?

4. In 2020, a school lunch cost ₱50. By 2024, the same meal costs ₱70. Meanwhile, a student's weekly allowance increased from ₱300 to ₱360.

Questions:

- Calculate the percentage increase in lunch cost.
- Calculate the percentage increase in allowance.
- Based on this, is the allowance increase enough to keep up with lunch inflation?

5. Your class is organizing a student council planning event with a ₱5,000 budget. You must prepare cost estimates for:

Food: Prices from 2022 were ₱2,000. Assume a 10% inflation.

Materials: Original cost ₱1,200. Available with 15% discount.

Services (printing/sound system): Quoted price ₱1,500 (VAT-inclusive).

You will sell custom keychains at ₱75 each. They cost ₱50 to make.

Questions:

- Adjust the food price using inflation.
- Compute the discounted price of materials.
- Determine the VAT-exclusive cost of services.
- If you sell 30 keychains, compute total profit and how it can support the event.

## Activity No. 2: PROGRESS CHECKING ACTIVITY ON PERCENTAGE

### Objective(s):

In this activity, you will showcase your understanding of how percentages are applied in real-life situations, such as calculating discounts, markups, taxes, inflation, and profit or loss. You are expected to solve each problem accurately to demonstrate your reasoning and computation skills.

**Materials Needed:** pen and paper, calculator, spreadsheet

**Instructions:** Solve each problem carefully and show your complete solutions.

1. In 2022, the average grocery cost was ₱5,500. In 2024, it rose to ₱6,050. What is the percentage increase?

2. A store buys shoes at ₱750 and applies a 20% markup.

a. Find the selling price.

b. A customer is offered either:

15% discount

Buy 1, get the 2nd at 60% off

Which is the better option for buying two pairs? Justify.

3. A microwave costs ₱4,500 before VAT. If VAT is 12%:

a. What is the VAT amount?

b. What is the final price?

4. A reseller buys a product for ₱850 and sells it at ₱1,100.
- Calculate the profit in pesos.
  - What is the profit as a percentage of the cost?
5. A mobile phone originally costs ₱18,000. During a sale, a 25% discount is applied.
- What is the discounted amount?
  - What is the final sale price?
6. Inflation is 5%. A worker's salary increased from ₱21,000 to ₱22,000.
- What is the percentage increase in salary?
  - Did their real income increase or decrease? Justify your answer.

**VII. Synthesis:**

5. What are the common applications of percentage in real life context?

---

---

---

6. Why is it important to understand how percentages work in everyday financial decisions?

---

---

---
