LEARNING ACTIVITY SHEET

Learning Area:	General Science	Quarter:	1
Lesson Exemplar No.:	2	Date:	
Lesson Title/Topic:	Applications of Translational and Rotational Motion		
Name:		Grade & Section:	

- I. Activity No. 7: Venn Diagram**
- II. Objective(s):** At the end of the activity, you should be able to compare and contrast translational and rotational motion.
- III. Materials Needed:** pen and paper
- IV. Instructions:** Using the eighteen statements given, create a Venn diagram showing the differences between translational motion and rotational motion. Write these differences inside their respective correct circles. Then, write their similarities in your own words.

Linear displacement

Linear velocity

Linear acceleration

The entire body always changes location

An accelerating dog

Angular displacement

Angular velocity

Angular acceleration

Spinning washing machine

The Earth spinning about its axis

All points have the same displacement.

All points travel in the same direction.

All points travel with the same velocity.

All points travel with the same acceleration.

The points have varying linear displacement.

The points travel with varying direction.

The points travel with varying linear velocity.

The points travel with varying acceleration.

V. Synthesis

1. How did you arrive at your answers? _____

2. How did you find the activity? Kindly describe and share your experience. _____

LEARNING ACTIVITY SHEET

Learning Area:	General Science	Quarter:	1
Lesson Exemplar No.:	2	Date:	
Lesson Title/Topic:	Applications of Translational and Rotational Motion		
Name:		Grade & Section:	

I. Activity No. 14: Motion at Work and Business

- II. Objective(s):** At the end of the activity, you should be able to determine how translational and rotation motion are applied in your dream job or business.
- III. Materials Needed:** pen or pencil and paper
- IV. Instructions:** Think of your dream job or business. Explain in at least three sentences a certain scenario or object in that dream job or business that exhibits both translation and rotation motion, either individually or together. Then, sketch such scenario or object.

Dream Job or Business: _____

Explanation: _____

Sketch:

V. Synthesis

1. How important do you think is understanding the concepts of translational and rotational motion in your dream job or business? _____

2. How did you find the activity? Kindly describe and share your experience. _____
