LEARNING ACTIVITY SHEET

Learning Area:	General Science	Quarter:	1
Lesson Exemplar No.:	6	Date:	
Lesson Title/ Topic:	Calculating Pressure in Real-Life Situations		
Name:		Grade & Section:	

I. Activity No. 1: Calculating Pressure in Real-Life Situations.

II. Objective(s):

1. Use the formula $P=F/A$ to solve for pressure, force, or area.
2. Analyze the relationship between force, pressure, and area in real-life situations.

III. Materials Needed: pen and paper, calculator

IV. Instructions: Analyze and solve each problem.

1. A woman weighing 600 N wears heels with a heel area of 0.001 m^2 . What pressure does each heel exert on the ground?

Given:

Ask:

Solution:

Final Answer:

2. A block exerts 600 Pa of pressure on the floor. The area of contact is 0.5 m^2 . What is the force exerted by the block?

Given:

Ask:

Solution:

Final Answer:

3. A 1200-N refrigerator exerts a pressure of 800 Pa on the floor. What is the area of its base?

Given:

Ask:

Solution:

Final Answer:

4. A man standing on snowshoes exerts a force of 800 N on the snow. The total area of the snowshoes is 0.4 m^2 . What pressure is applied to the snow?

Given:

Ask:

Solution:

Final Answer:

5. A suitcase exerts a pressure of 4000 Pa on the floor. Its base has an area of 0.05 m^2 . What is the weight of the suitcase in Newtons (N)?

Given:

Ask:

Solution:

Final Answer:

V. Synthesis:

1. What did you discover about the relationship between force, area, and pressure after solving the problems?

2. How did understanding the relationship between force, area, and pressure help you solve the problems?
