### I. Activity No. 1: Hazard Hunt

**II. Objective(s):** At the end of the activity, you should be able to look for signs of potential electrical hazards and recommend actions.

**III. Materials Needed:** pen and paper, Electrical Inspection Checklist

### IV. Instructions:

1. This is a two-phased activity. Wait for the instruction from your teacher when to accomplish each phase.
2. For the Phase 1: Spot the Danger, carefully inspect your assigned area for any signs of potential electrical hazards. Use the *Electrical Inspection Checklist* as a guide to help you identify and evaluate possible risks. As you conduct your inspection, document any observed hazards by taking clear and relevant photos. Make sure each photo corresponds to specific items on the checklist to ensure accurate and organized reporting of your findings.
3. For Phase 2: Power Up Safety, assess the risk level of the identified hazards. Suggest Actions and identify the responsible person.

Refer to this guide for the risk level rating:

*Low Risk*- Minimal Danger, can be easily managed with basic precautions.

*Medium Risk*- Moderate danger, could lead to injury or equipment damage if left unchecked.

*High Risk*- Severe danger, poses an immediate risk of electrocution, fire, or equipment failure.

| PHASE 1 (Spot the Danger)                      |                              | PHASE 2 (Power Up Safety)    |                   |                    |
|------------------------------------------------|------------------------------|------------------------------|-------------------|--------------------|
| Inspection Items                               | Documentation (Attach photo) | Risk Level (Low/Medium/High) | Suggested Actions | Responsible Person |
| A. Outlets and Wires                           |                              |                              |                   |                    |
| <input type="checkbox"/> Overloaded sockets    |                              |                              |                   |                    |
| <input type="checkbox"/> Damaged/exposed wires |                              |                              |                   |                    |

|                                                                        |  |  |  |  |
|------------------------------------------------------------------------|--|--|--|--|
| <input type="checkbox"/> Flickering lights                             |  |  |  |  |
| B. Appliances and devices                                              |  |  |  |  |
| <input type="checkbox"/> Overheating appliances                        |  |  |  |  |
| <input type="checkbox"/> Tangled or unsafe extension cords             |  |  |  |  |
| <input type="checkbox"/> Unplugged unused devices                      |  |  |  |  |
| C. Environmental Risks                                                 |  |  |  |  |
| <input type="checkbox"/> Electrical items near water/ damp area        |  |  |  |  |
| <input type="checkbox"/> Wires and devices placed unsafely             |  |  |  |  |
| <input type="checkbox"/> Improper ventilation for electrical equipment |  |  |  |  |

|                                                              |  |  |  |  |
|--------------------------------------------------------------|--|--|--|--|
| D. Emergency Readiness                                       |  |  |  |  |
| <input type="checkbox"/> Working fire extinguisher nearby    |  |  |  |  |
| <input type="checkbox"/> Emergency contact availability      |  |  |  |  |
| <input type="checkbox"/> Placed Electrical Safety Procedures |  |  |  |  |
| E. Other Hazards                                             |  |  |  |  |

*Electrical Inspection Checklist (Adapted from Jones & Bartlett Learning, Electrical Inspection Checklist: 2015 (Burlington, MA: Jones & Bartlett Learning, an Ascend Learning Company, 2015))*

#### Guide Questions:

1. What were the most common electrical hazards identified during the inspection?

---

---

2. Were there any hazards that surprised you or that you hadn't considered before?

---

---

3. Which hazards pose the greatest risk?

---

---

4. What simple actions can reduce electrical hazards found during inspection?

---

---

5. How can schools, homes, or businesses improve their electrical safety practice?

---

---

#### V. Synthesis:

1. How did you arrive at your answers?

---

---

---

2. How did you find the activity? Can you share and describe your experience?
