LESSON EXEMPLAR

Learning Area	Life and Career Skills	Grade Level	11
Semester	First	Quarter	Second

I. OBJECTIVES (Identifying the Goals)

Content Standard	The learner demonstrates an understanding of the value of interpersonal effectiveness in achieving social competence.
Performance Standard	The learner engages in collaborative work that showcases interpersonal effectiveness
Learning Competencies	Apply skills in enhancing social interaction through different social activities

II. REFERENCES and MATERIALS

(Selecting Resources and Material)

References:

1. **Department of Education Life Skills Curriculum Guide (Senior High School)** – Core document outlining standards, competencies, and curriculum goals.
2. **DepEd Order No. 21, s. 2019** – Policy guidelines on the K to 12 Basic Education Program which emphasize learner-centered instruction.
3. **Goleman, Daniel. Social Intelligence: The New Science of Human Relationships.** – Provides theoretical foundation on interpersonal effectiveness.
4. **Videos from youtube.com**
5. **Teacher-created resources**, such as:
 - o Concept maps and graphic organizers on interpersonal effectiveness
 - o Role-play scripts for group dynamics
 - o Assessment rubrics for self- and peer-assessment

Materials and Tools:

- **Multimedia Equipment:** Projector or large monitor, speakers (for video-based activities)
- **Online Platforms:** Google Forms, Padlet, Trello, or MS Forms (for collaboration tracking and digital tasks)
- **Printable Resources:**
 - o Collaboration Rubric
 - o Concept Mapping Templates
 - o Team Puzzle Logic Grids
 - o Planning Sheets for Project Simulation
 - o Interview Guide Template

	• Classroom Materials: Sticky notes, markers, poster paper (for gallery walks, quotes, charters) • Devices: Smartphones or tablets (for recording podcasts/vlogs or conducting online interviews) • Internet Access: To support research, collaboration, and tech-enhanced tasks	
(These shall be accomplished per topic.)		
III. CONTENT (Sequencing Content)	Building Interpersonal Effectiveness through Social Interaction in Group Activities	
IV. OBJECTIVES (Setting Clear Objectives and Analyzing the Tasks)	1. discuss group activities that help in enhancing social interactions; 2. relate knowledges and skills gained from group activities; and 3. show collaboration in group activities by cooperating with peers and fulfilling assigned roles.	
IV. PROCEDURES		ANNOTATION
A. Activating Prior Knowledge	1. Activating Prior Knowledge (20 minutes) Option 1: Quick Scenario Talk Pose this question: “Think of a time when you had to work in a group—what made it work or not work?” Students will share their answers in pairs, then a few pairs will share insights with the class. Processing Questions: 1. How did you feel when your group worked together? 2. What did you or someone else do in the group that helped things go smoothly and made things harder? Option 2: Visual Prompt – Collaboration in Action Show a short video clip or image of people successfully working together (e.g., a rescue team ar a sports team). Ask: “What qualities do you see that made this group effective?” (https://www.youtube.com/watch?v=KT2TQGFwcko) Processing Questions:	Instruction to the Teacher: To effectively facilitate the Activating Prior Knowledge component of the lesson, begin by setting up a supportive and open classroom environment. For Option 1: Quick Scenario Talk , guide students to reflect on past group experiences—successful or otherwise. Encourage honesty and active listening during pair sharing. Afterward, select a few pairs to share highlights with the whole class to uncover patterns and set the tone for the topic. For Option 2: Visual Prompt , prepare a short, clear video clip or a compelling image that portrays effective group collaboration (e.g., a sports team working in harmony or a community volunteer effort). After viewing, guide a brief class discussion using probing questions to help students identify key interpersonal behaviors observed. Ensure that

	1. What experience helped you realize the value of collaboration in a group? 2. What behaviors did you observe that made teamwork successful? 3. What specific behavior would you change from a past group experience to improve your collaboration? Why? 2. Establishing the Purpose of the Lesson (20 minutes) Option 1: Big Question Posting Post the essential question on the board: “How do we become effective team members in school and beyond?” Ask students to respond using sticky notes and post them on the board. Processing Questions: 1. Which of the sticky note answers do you personally relate to the most, and why? 2. Can you think of a moment when you felt like a valuable team member? What made that experience meaningful for you? 3. How do you hope to grow as a team member—both in school and in other parts of your life? Option 2: Group Commitment Contract Each group writes a short statement of how they will work collaboratively today (e.g., “We will listen to each other and share tasks equally”). Display in the classroom.	responses are acknowledged and linked to the day’s lesson on interpersonal effectiveness. Annotation on Instruction Delivery Framework (IDF): This part of the lesson applies the IDF principles by being relevant, as it taps into the lived experiences of students and familiar visual contexts that mirror real group dynamics. It is reflective, as students are encouraged to examine their own past behaviors and insights from peers, allowing them to better understand collaboration. Finally, it is responsive, as teachers adjust follow-up questions based on student input and foster open dialogue to validate different perspectives. These approaches ensure that the learners’ prior knowledge meaningfully connects with new concepts, setting a strong foundation for deeper understanding and application. Instruction to the Teacher: To effectively facilitate the Establishing the Purpose of the Lesson activities, begin by creating a safe and inclusive environment for students to express their thoughts. For Option 1, write the essential question clearly on the board and distribute sticky notes to each student. Allow a few minutes for them to reflect and write down their thoughts, then invite volunteers to share before posting their notes. For Option 2, provide each group with a short guide or sentence starter for crafting their commitment contract. Encourage them to include specific behaviors they aim to demonstrate (e.g., listening actively, dividing tasks fairly). Once completed, have the groups post their contracts visibly in the classroom. These will serve as a reference throughout the lesson to guide behavior and reinforce purpose. For Option 3, Ask
--	--	---

	Processing Questions: 1. What does your group commitment say about the team you want to be today? 2. How does it feel when everyone agrees on the group's commitment? 3. How can your commitment help your group handle challenges? Option 3: Tower Building Form groups of 4–5 members. Using limited materials (e.g., 10 pieces of paper/broomstick /straws, 1 roll of tape, scissors), build the tallest and strongest free-standing tower you can in 10 minutes. You must work together, plan, and assign roles before you begin. After time is up, observe and compare the towers. A short discussion will follow. Processing Questions: 1. What made your group work well or struggle during the activity? 2. How did communication and cooperation affect your tower? 3. Why are social interaction and teamwork important in group activities?	students to form small groups and give each group limited materials (e.g., paper and tape). Instruct them to build the tallest free-standing tower in 10 minutes. Emphasize teamwork, communication, and cooperation throughout the task. Observe group interaction for debriefing. Annotation (Instruction Delivery Framework): This part of the lesson exemplifies the Instruction Delivery Framework (IDF) by being relevant, reflective, and responsive. The essential question and group commitments make the lesson relevant by connecting classroom collaboration with real-life teamwork experiences. It becomes reflective as students consider their past experiences and articulate how they want to interact today. Lastly, it is responsive because it allows the teacher to gauge students' understanding and attitudes toward collaboration, then adjust guidance and support based on their input. These practices set a meaningful foundation for the rest of the learning experience.
B. Instituting New Knowledge	1. Presenting Examples (20 minutes) Option 1: Real-Life Case Video Show a short video (3–5 minutes) about a team accomplishing a goal Ask: "What made this team effective?" https://www.youtube.com/watch?v=3z_g9AX8vjk&list=TLPQMDcwNTIwMjVYRYTki7ypbw&index=2 Processing Questions 1. Which team member in the video do you relate to the most? 2. Have you experienced a group that worked well or struggled? What made the difference? 3. What one team strategy from the video would you try next time? Option 2: Role Play – "A Day in School" Instructions for Students	Instruction to the Teacher: To facilitate the three optional activities effectively under Presenting Examples, begin by choosing the most suitable activity for your learners' context and resources. For Option 1 (Real-Life Case Video), prepare the video in advance and ensure good audio-visual equipment is available. After viewing, guide a class discussion using the processing questions to unpack observed collaboration skills. For Option 2 (Role Play – "A Day in School"), assign or let groups choose scenarios in advance, give time to prepare, and encourage creativity while focusing on real interpersonal interactions. For Option 3 (Infographic Gallery Walk), display teamwork-

	1. Form a Group. Ensure that each member has a role in both planning and performing the role-play. 2. Select a Scenario: Choose a school-based group activity scenario that highlights collaboration and interpersonal effectiveness. Example scenarios include: • Planning a class event (e.g., a mini fair or educational campaign) • Resolving a misunderstanding in a group project • Distributing tasks during a clean-up drive or classroom duty • Welcoming a new student into a group 3. Assign Roles: Each member must take on a specific role (e.g., group leader, team member, facilitator, mediator). Roles should reflect typical interpersonal situations encountered in school group settings. 4. Plan the Script: As a group, create a short script or outline of your role-play. Ensure that your performance clearly shows effective communication, cooperation, and problem-solving. 5. Rehearse: Practice your role play to ensure clarity, timing, and smooth transitions between speakers. 6. Perform: Present your role play in front of the class. Each group will be given 3–5 minutes for the performance. 7. Reflection Questions (to be answered after the presentation): • What teamwork skills did your group demonstrate best? • How did your group handle challenges or disagreements? • What lesson about interpersonal effectiveness did your role play communicate? Option 3: Infographic Gallery Walk Display sample infographics showing teamwork skills (communication, respect, flexibility). Students walk around and discuss observations. Processing Questions:	related infographics around the room. Have students rotate in small groups, jotting down reflections on sticky notes or in notebooks. Wrap up with a whole class debrief to draw connections between observed teamwork skills and their application in school settings. Annotation (IDF Application): This section of the lesson exemplifies the Instruction Delivery Framework (IDF) through activities that are relevant, reflective, and responsive. It is relevant because each option connects students to real-life or relatable team scenarios, anchoring learning in authentic contexts. It is reflective as students analyze actions, behaviors, and strategies that contribute to successful collaboration, then relate them to their own experiences. The teacher’s role in processing responses and guiding discussion makes the activity responsive to the learners’ input, building on their observations and insights to reinforce key interpersonal effectiveness skills in a dynamic and engaging way.
--	--	---

	1. What specific actions or behaviors did you notice in the video/skit/infographic that showed effective collaboration among team members? 2. How did the way the group handled challenges or tasks in the example relate to your own experience in working with others? 3. Which teamwork quality presented stood out to you the most, and why do you think it's essential in achieving group goals? 2. Discussing New Concept (30 minutes) Option 1: Concept Mapping on “Interpersonal Effectiveness through Social Interaction in Group Activities.” Steps for Students: 1. Form a group of 4–5 members. Assign roles such as discussion leader, note-taker, illustrator/designer, and presenter. 2. Discuss the central concept: “Interpersonal Effectiveness through Social Interaction in Group Activities.” Start by brainstorming the core ideas involved—these may include skills like communication, cooperation, responsibility, respect, empathy, and fulfilling roles in a team. 3. Create your concept map: • Place the main idea at the center of your paper or digital document. • Create branches for each key interpersonal skill discussed. • Add sub-branches with definitions, real-life examples, and how each skill helps in group settings. • Use arrows, colors, or symbols to make connections clear and engaging. 4. Share your experiences: As you map your ideas, contribute examples from past group work, class activities, or personal experiences that demonstrate these skills in action. 5. Review your map together: Make sure it clearly shows how the skills are connected and why they are important for effective teamwork. 6. Summarize your insights: In your notebooks, individually write a short summary including: • What is interpersonal effectiveness?	Instructions to the Teacher: To effectively facilitate the two optional activities under Discussing New Concept, begin by introducing the topic “Interpersonal Effectiveness through Social Interaction in Group Activities” and its relevance to students' lives. For Option 1: Concept Mapping, present a partially filled concept map on the board or screen highlighting key ideas such as communication, teamwork, respect, and responsibility. Encourage students to observe patterns, contribute their interpretations, and offer real-life examples during a guided discussion. Foster a respectful and interactive classroom atmosphere where students can build on each other's inputs. For Option 2: Structured Input Worksheet, distribute or project the worksheet and walk students through its sections. Allow time for individual reflection and completion, then pair students for brief sharing. Monitor responses to ensure they are specific and thoughtful and wrap with a synthesis of key takeaways using the provided processing questions. Annotation (IDF Application): Both activities exemplify the Instruction Delivery Framework (IDF) by fostering a relevant, reflective, and responsive learning environment. The relevance of the learning environment is established by anchoring the lesson in students' social realities—group work, peer interaction, and shared tasks. The reflective element is embedded
--	--	---

	• What are the most important skills discussed? • Why are these skills essential in group activities? 7. Present your concept map to the class and explain its key components. Processing Questions: 1. Which interpersonal skills do you personally find most helpful when working in a group, and why? 2. How did working with your group help deepen your understanding of interpersonal effectiveness? 3. In what ways can this concept map guide you to be a more effective team member in future activities? Option 2: Structured Input Worksheet Steps for Students: 1. Examine the Worksheet Structure: Your worksheet consists of three columns: ○ Interpersonal Skill (e.g., Active Listening, Cooperation, Responsibility) ○ Example of Group Activity (e.g., planning a class program, cleaning the classroom, group reporting) ○ Effect on Group Outcome (e.g., improved participation, conflict resolution, task completion) 2. List Key Interpersonal Skills: Think about the recent group activities you've participated in. Write at least three interpersonal skills that were used during those tasks. 3. Give Real-Life Examples: For each interpersonal skill, describe a realistic example of how it was applied in a school-based group activity. Be specific and use actual or relatable scenarios. 4. Describe the Positive Outcome: Explain how using that skill helped your group succeed. What changed because that skill was applied? Consider group performance, participation, or atmosphere. 5. Reflect on Your Learning: Review your answers. Which of these skills do you already use confidently? Which ones would you like to improve? You may be asked to share one	through personal connections to the content, as students examine and articulate their experiences with interpersonal skills. Lastly, the activities are responsive because they allow flexible, student-centered approaches to concept exploration: learners can either visually co-construct meaning through the concept map or personalize their understanding through written examples in the worksheet. Both options promote dialogue, critical thinking, and ownership of learning—cornerstones of effective and inclusive instruction aligned with the IDF.
--	---	---

	insight with the class or submit your worksheet for teacher feedback. Processing Questions: 1. Which of the interpersonal skills do you feel most confident using in group activities, and why? 2. How does your behavior impact the way your group functions and performs? 3. What is one interpersonal skill you want to improve, and what will you do to develop it? 3. Developing Mastery (30 minutes) Option 1: Small Group Challenge – Team Puzzle (School Club Schedule Mix-Up) Groups solve a logic puzzle with individual roles (leader, recorder, checker, etc.) and reflect on their group process. Steps for Students: 1. Form Your Team and Assign Roles: Get into your assigned group (4–5 members). Assign and agree on team roles: - Leader – keeps the group focused and encourages participation - Timekeeper – monitors time and keeps everyone on task - Recorder – writes down the group’s decisions and answers - Checker – reviews all answers and ensures accuracy - Presenter – shares the group’s final solution with the class 2. Understand the Puzzle Challenge: Your group will receive a logic-based scheduling problem called “School Club Schedule Mix-Up.” Read the scenario and constraints carefully. Clarify unfamiliar terms or conditions with your group or teacher. 3. Collaborate and Solve the Puzzle: Using your roles, work as a team to solve the problem. Practice active listening, ask clarifying questions, and support each other’s ideas. Your goal is not just to solve the puzzle, but to apply strong interpersonal effectiveness while doing it. 4. Reflect on the Group Process: After solving the puzzle, have a short team discussion about your experience: • What went well in your group’s communication and cooperation?	Instructions to the Teacher: To facilitate the two Developing Mastery activities, begin by clearly communicating the learning objective: to demonstrate collaboration through cooperation and role fulfillment. For Option 1: Team Puzzle, organize students into small, diverse groups and guide them in assigning roles to promote responsibility and engagement. Provide a brief but clear overview of the logic puzzle and its constraints, ensuring all members understand the challenge. Circulate during the activity to observe group dynamics, offer encouragement, and pose guiding questions without providing solutions. After the task, lead a reflective discussion using the processing questions. For Option 2: Collaboration Tracker, ensure students have digital access and introduce the form by explaining its sections. Prompt them to recall specific experiences from a recent group task. Encourage honest, reflective responses and facilitate brief peer sharing in small groups. Conclude with a whole-class debrief to identify common themes and growth areas in interpersonal collaboration. Annotation (IDF Application): These Developing Mastery activities embody the Instruction Delivery Framework (IDF) principles by being relevant, reflective, and responsive. The
--	--	---

	• What challenges did you face and how did you overcome them? • How did each member contribute to solving the task? 5. Share Your Experience and Solution: The Presenter will explain your group's answer and summarize your teamwork process. Include examples of interpersonal skills your team used (e.g., compromise, encouragement, clarification). Processing Questions 1. What interpersonal skills were most useful in helping your group succeed in this task? 2. How did your assigned role help you contribute meaningfully to the group? 3. If you could improve one aspect of your teamwork, what would it be and why? Option 2: Digital Task – "Collaboration Tracker" Students use a simple online form to log group contributions, challenges, and solutions across previous group activities. 1. Open the Collaboration Tracker Form: Click the link provided by your teacher to access the digital tracker form. Read through each section carefully. It will ask for: ○ Your name and group number ○ Your assigned role during the activity ○ Your contribution to the task ○ Challenges your group faced ○ How those challenges were resolved 2. Reflect on Your Experience: Think back to your most recent group activity. What tasks did you complete? How did you interact with your teammates? What worked well, and what didn't work? 3. Fill Out the Tracker Honestly: Complete each section with honest, specific, and thoughtful answers. Avoid generic statements. Use complete sentences when possible. 4. Share an insight with a Peer: Pair up or form a small group. Each of you should share one key takeaway from your reflection. This may include a skill you realized you need to improve, a group strength you observed, or a challenge that was overcome.	Team Puzzle connects to students' real-life teamwork experiences, making learning relevant through meaningful problem-solving that mimics real-world collaboration. The structured roles and group reflections promote reflective learning, allowing students to evaluate both individual and group performance. Meanwhile, the Collaboration Tracker provides a responsive platform for students to process and articulate their experiences using digital tools, fostering metacognition and inclusivity. Both options support student ownership of learning, emphasize communication and accountability, and adapt to diverse learning styles—fulfilling the core vision of IDF.
--	---	---

	5. Submit and Join the Debrief: Submit your form online. Listen actively as the teacher facilitates a short class debrief, summarizing patterns in student responses and highlighting key interpersonal themes like empathy, role fulfillment, and group accountability.	
C. Demonstrating Knowledge and Skills	1. Finding Practical Application (20 minutes) Option 1: Group Simulation – "Plan a Classroom Project" Students work in groups to design a mini project (e.g., clean-up drive, awareness campaign) showcasing teamwork and role distribution. 1. Gather Your Team and Pick a Name: Start by forming your group. Come up with a fun or meaningful group name that reflects your team's identity—it could be related to your goal or simply something that makes you smile. 2. Spot a Need in Your Classroom: Together, talk about what issues you see around you. 3. Choose a Project That Makes Sense: Select one project idea that your group is most passionate about. Make sure it's doable with the time and materials you have. Think practical but impactful—this could be a donation drive, an awareness campaign, or a student-led initiative. 4. Plan It Like Pros: Assign roles in your team (like leader, timekeeper, researcher, presenter). Use the planning guide provided to outline the project goals, tasks, timeline, and who will do what. Communication and teamwork matter here, so listen to each other and work together. 5. Present Your Project: Prepare a short presentation about your plan. Use simple visuals or props if you want. Present your project to the class and show how your team worked together to make the plan. 6. Take a Moment to Reflect: After all presentations, think back to how your group worked. What was your personal contribution? What part of the teamwork stood out? What might you want to do differently next time? Be honest—it's how we grow. Processing Questions: 1. What role did you take in your group, and how did you contribute to the planning process?	Instructions to the Teacher: To facilitate the two optional activities under Finding Practical Application, provide clear guidance and set expectations for each task. For Option 1 (Group Simulation – "Plan a Classroom Project"), assign students into small groups and provide them with a structured brainstorming session to identify real community or school needs. Encourage each group to think creatively while focusing on practical solutions. Provide tools like graphic organizers or planning sheets to help them structure their ideas. Ensure students assign roles to facilitate teamwork and task distribution, and after presentations, guide a reflective discussion where each student shares their contributions and insights. For Option 2 (Interview with a Team Player), help students identify a professional to interview, ensuring they have clear permission and a well-prepared set of questions. Advise students on how to conduct interviews respectfully and effectively, whether online or in person. After the interviews, allow time for students to write their summaries and share key findings, promoting discussion about teamwork in professional settings and how they can apply these lessons to their own collaborative work. Annotation (IDF Application): The Finding Practical Application section exemplifies the Instruction Delivery Framework (IDF) through relevant, reflective, and responsive activities. The activities are relevant because they connect classroom learning to real-

	2. What specific teamwork behavior or communication helped your group stay productive? 3. If your group could do the planning again, what changes or improvements would you suggest? Option 2: Interview a Team Player Assign students to interview a professional (virtually or in-person) who works in a team setting (e.g., nurse, chef, engineer). 1. Choose Your Interviewee: Identify a working professional who is a part of a team in their workplace—this could be a teacher, nurse, chef, engineer, call center agent, or anyone you know who regularly works with others. Ask for their permission kindly and explain that the interview is a part of a school activity focused on understanding teamwork. 2. Prepare for the Interview: Review the list of questions below and feel free to add your own. The goal is to understand how teamwork happens in the real world. Write your questions down ahead of time so you feel confident and prepared. Sample Questions: • What is your role in your team? • How do you and your teammates divide tasks? • What makes your team effective? • What challenges do you face when working with others? • How do you solve misunderstandings or conflicts? • Why is teamwork important in your job? • What advice can you give students about working in teams? 3. Conduct the Interview: Whether in person or virtually, make sure you are respectful and attentive. Take detailed notes or ask (with permission) if you can record the conversation for review later. Be polite and thank them afterward. 4. Write a Summary: After the interview, write a short paragraph (or two) summarizing what you learned. Focus on the teamwork aspects that stood out to you—what was interesting, inspiring, or even surprising? 5. Report to the Class: Prepare a quick oral or written report highlighting two or three key insights you gained from your	world situations—whether planning a community project or interviewing a professional—providing students with practical, meaningful experiences that tie into their own lives and futures. They are reflective as students evaluate their teamwork processes, reflect on real-world insights, and consider how they can apply these lessons in future group settings. The activities are responsive because they encourage interaction with peers, professionals, and community members, promoting deep discussions and learning experiences that adapt to students' own observations, questions, and insights.
--	--	---

	interview. You may include a quote, an idea you want to try in school, or a skill you want to develop. 6. Reflect on the Experience: Take a moment to answer the reflection question below. Be honest and thoughtful—this is about your own growth and how you can become a better team player. Processing Questions: 1. What was one thing the interviewee shared about teamwork that really made you think differently about how people work together? Why did it stand out to you? 2. Were there any challenges your interviewee mentioned that you’ve also experienced in group work at school? How did they handle it differently (or similarly)? 3. After this interview, what personal changes or improvements would you like to make when working in your next group activity? 2. Making Generalization (20 minutes) Option 1: Reflection Journal Prompt: “What interpersonal skills helped me succeed in group work? What would I improve?” Option 2: “Class Charter for Teamwork” As a class, students co-create a “Teamwork Charter” listing the do’s and don’ts of effective group work based on their experience and insights from the lesson. Option 3: Gallery of Quotes In small groups, students create short slogans or quotes that summarize what they’ve learned about building interpersonal effectiveness through social interaction in group activities. These are posted around the classroom.	Instructions to the Teacher: To facilitate the three optional activities under Making Generalization, begin by setting the tone for reflection and synthesis. For Option 1: Reflection Journal, give students quiet time to individually respond to the prompt: “What interpersonal skills helped me succeed in group work? What would I improve?” Encourage honesty and self-awareness. For Option 2: Class Charter for Teamwork, lead a short whole-class discussion by asking students what behaviors they found most helpful or unhelpful during group tasks. Record their ideas on the board and guide the class in phrasing them as positive “do’s” and “don’ts” to form a classroom charter, then display this visibly. For Option 3: Gallery of Quotes, divide the class into small groups and instruct them to create short, catchy quotes or slogans based on their learning. Supply materials (paper,
--	--	--

	markers, etc.) and display the finished work in a gallery walk format for all to see and reflect on. Annotation (Instruction Delivery Framework): These generalization activities align with the Instruction Delivery Framework by being relevant, reflective, and responsive. They are relevant as they are drawn directly from students' recent collaborative experiences, helping them connect learning to real-life teamwork. They are reflective because each activity invites students to assess their strengths and areas for growth in interpersonal skills. Finally, they are responsive by valuing a student's voice—whether through personal journals, shared norms, or creative expressions—allowing the lesson to adapt to what students truly experienced and learned. This deepens ownership and understanding of effective group collaboration. Instructions to the Teacher: To facilitate the three optional activities under Evaluating Learning, begin by setting clear expectations for honest and respectful reflection. For Option 1: Peer and Self-Assessment Rubric, distribute or co-create a rubric with students that outlines clear criteria such as participation, communication, and cooperation. Allow time for both self-assessment and peer-assessment, reminding students to provide constructive feedback. For Option 2: Teamwork Showcase Panel, guide each group to prepare a short presentation summarizing their group experience, including how roles were assigned, challenges encountered, and insights gained about collaboration. Encourage creativity in the format—posters, storytelling, or short talks. For Option 3:
	3. Evaluating Learning (20 minutes) Option 1: Peer and Self-Assessment Rubric Students rate their own and group members' contributions based on a rubric (criteria: participation, communication, cooperation). Option 2: Teamwork Showcase Panel Invite each group to present a short summary of their teamwork experience and insights. Include reflections on the challenges faced, how roles were assigned and carried out, and one lesson learned about collaboration. Option 3: Written Reflection Quiz Short-answer format evaluating understanding of interpersonal effectiveness, roles in group work, and lessons learned.

	4. Additional Activities (30 minutes) Option 1: “Teamwork Skills Scavenger Hunt” (Movement-Based Review) Create a classroom scavenger hunt where teams must find task cards hidden around the room. Each card describes a common teamwork scenario (e.g., "Someone is not contributing" or "The team finishes early—what next?"). Teams must read each card together and write how they would respond using interpersonal effectiveness (e.g., communicate openly, reassign roles, check understanding). Option 2: “Team Podcast or Vlog” (Creative Collaboration Task) Students work in small teams to record a short podcast or video vlog where they share their insights and advice on effective group	Written Reflection Quiz, provide short-answer prompts that assess students’ understanding of interpersonal effectiveness and role fulfillment. Allow time for students to answer thoughtfully, then use selected responses to spark a brief class discussion or identify areas for improvement. Annotation on Instruction Delivery Framework: This part of the lesson applies the Instruction Delivery Framework by being relevant, as students evaluate their real experiences in group work, linking their reflections to authentic classroom and life situations. It is reflective, since all three activities prompt students to analyze their actions, behaviors, and contributions, helping them internalize interpersonal skills. Finally, it is responsive, allowing students to express unique challenges and insights while giving teachers valuable information to address learning gaps or reinforce positive behaviors. Each activity empowers students to take ownership of their learning and growth in collaborative settings. Instructions to the Teacher: To facilitate the three optional activities under Additional Activities, begin by organizing students into small collaborative groups and clearly explaining the expectations for each task. For the Teamwork Skills Scavenger Hunt, prepare and place scenario task cards around the room ahead of time. Explain that students must find a card, read the scenario as a group, and write down a collaborative response that demonstrates interpersonal effectiveness. Rotate groups until all scenarios are completed or time runs out. For the Team Podcast or Vlog, guide students through forming production teams and brainstorming key teamwork messages. Support them in role
--	--	---

	work. They must script, assign roles (host, speaker, editor, etc.), and reflect on their teamwork as part of the submission. Option 3: “Go for a Solution” (Collaborative Problem-Solving Rotation) Each group starts with a group-work-related problem (e.g., one team member dominating the task, unclear roles, or group falling behind). After 3–5 minutes of brainstorming solutions, they “pass” the problem to another group, which adds or improves the previous solution. This continues until all groups have contributed.	assignment (host, editor, speaker, etc.) and remind them to script and reflect on their experience. Lastly, for Go for a Solution, distribute one group-work scenario per group and allow time for brainstorming. After each round, groups rotate the scenario and build on or improve the previous group's solution. Summarize insights from all three activities in a short class reflection or debrief. Annotation on the Instruction Delivery Framework: These additional activities are intentionally designed to be relevant, reflective, and responsive. They are relevant because they mirror real-life teamwork situations students are likely to encounter in school or future work settings, promoting practical application of interpersonal skills. The activities are reflective, encouraging students to assess their responses to group challenges, consider their communication patterns, and evaluate their role in a team. Finally, they are responsive by allowing multiple modes of participation—movement, multimedia creation, and critical thinking—thereby honoring students' varied strengths, learning preferences, and cultural expressions. Each task provides an authentic context for reinforcing collaboration skills while deepening students' understanding of their role in effective group dynamics.
--	--	--

**V.
ASSESSMENT**
(Assessing
Learnings)

1. Performance Task

Group Project Presentation: “Our Interpersonal Journey”

Each group will present a reflective showcase of their collaborative project (e.g., community campaign, class-based event plan). The presentation should include:

A. About the Process

1. What roles did each member take, and how did those roles support your group?
2. How did your group handle challenges or misunderstandings?

B. About the Outcome

3. What did your group accomplish together?
4. How did working as a team improve your final output?

C. About the Reflection

5. What important lesson did you learn about teamwork during this project?
6. How will you apply this teamwork experience in your next group activity?

Criteria	1 – Beginning	2 – Developing	3 – Proficient	4 – Excellent
Clarity of Project Outcome	Lacks clarity; outcome is unclear or missing	Some parts unclear or incomplete	Clear and complete outcome; meets expectations	Clear, organized, and creative product or plan presented; exceeds expectations
Explanation of Team Roles & Process	Roles/process barely mentioned or unclear	Limited explanation of roles or group process	Most roles and processes explained clearly	All roles clearly defined; group dynamics explained with insight
Communication & Presentation	Weak or disorganized delivery; minimal group participation	Uneven delivery; limited participation	Clear and well-organized; most members contribute	Confident, collaborative, and engaging presentation; all members contribute
Reflection on Teamwork	Minimal or superficial reflection	Basic reflection with limited depth	Good reflection; most key points covered	Deep, honest insights into challenges, growth, and teamwork lessons

2. Written Assessment

“How did working with others help me grow as a person?”

Students respond to prompts about self-awareness, team interaction, and future improvement.

Criteria	1 – Beginning	2 – Developing	3 – Proficient	4 – Excellent
Self-Awareness	Limited or no self-awareness demonstrated	Mentions growth with limited explanation	Identifies personal growth with some detail	Thoughtfully explores personal growth through team interaction
Team Insight	No clear connection to team interaction	Vague or general discussion of teamwork	Makes basic connection to team interaction	Clearly connects experiences to interpersonal/teamwork concepts
Future Focus	No forward-thinking ideas offered	Few or unclear plans for future teamwork	Suggests some improvements or takeaways	Provides meaningful ideas for future improvement or application
Organization & Clarity	Poorly organized or difficult to follow	Somewhat disorganized or with noticeable errors	Clear and generally organized	Well-organized, coherent, and free of major errors

3. Portfolio

Students compile all outputs from the unit (e.g., group contract, role play scripts, collaboration tracker, journal entries) into a digital or physical portfolio.

Criteria	1 – Beginning	2 – Developing	3 – Proficient	4 – Excellent
Completeness	Few or no required documents included	Several documents missing or incomplete	Most required documents included	All required documents included and thoughtfully compiled
Quality of Artifacts	Low quality or unrelated to lesson objectives	Inconsistent quality or unclear connection to objectives	Satisfactory quality with relevance	High-quality, well-prepared outputs with clear relevance

	Reflection and Growth	No meaningful reflection present	Minimal reflection on learning experiences	Basic reflection evident on key activities	Reflective notes show deep personal and group learning
	Organization & Presentation	Disorganized or difficult to understand	Some disorganization; needs guidance to follow	Mostly organized and readable	Logical, clean layout; easy to navigate (digital or physical)

VI. REFLECTION (Feedback and Continuous Improvement)	The teacher will ask the student how important group activities help in enhancing social interactions in the following context • Home • School • Community
