LESSON EXEMPLAR

Learning Area	Life and Career Skills	Grade Level	11
Semester	1st semester	Quarter	Second Quarter

I. OBJECTIVES *(Identifying the Goals)*

Content Standard	<i>The learner demonstrates understanding of the value of interpersonal effectiveness in achieving social competence.</i>
Performance Standard	<i>The learner engages in collaborative work that showcases interpersonal effectiveness.</i>
Learning Competencies	<i>Apply skills in enhancing social interaction through different social activities</i>

II. REFERENCES and MATERIALS

III. CONTENT

(Sequencing Content)

Recreational and Rhythmic for Developing Social Skills

IV. OBJECTIVES <i>(Setting Clear Objectives and Analyzing the Tasks)</i>	At the end of the session, the learners will be able to: 1. <i>Identify different recreational and rhythmic activities.</i> 2. <i>Explain the importance of recreational and rhythmic activities to achieve interpersonal effectiveness and social competence.</i> 3. <i>Use social skills in recreational and rhythmic activities</i>	
IV. PROCEDURES	ANNOTATION	
A. Activating Prior Knowledge	Option 1: <u>Two Truths and a Lie (40 minutes)</u> Instructions 1. Prepare: Each person thinks of three "facts" about themselves relative to the Team Sports and Filipino Games theme. Two of these facts should be true, and one should be a lie. Try to make the truths believable, but also make the lie sound plausible. 2. Share: One person shares their three "facts" in a random order. For example: "I have played basketball with my friends at least once a week.", "I have joined a Patintero game during a family gathering or fiesta.", "I have never heard of the Filipino game 'Sipa' before today." 3. Guess: The other players listen carefully and try to guess which statement is the lie. 4. Reveal: After everyone has guessed (or after a set time), the person reveals which statement was the lie. 5. Repeat: Continue taking turns until everyone has shared their "two truths and a lie." Process Questions: 1. How did you figure out which statement is a lie?	Note to teacher: ✧ Instructional Design Framework (IDF) Mapping: 3Rs, Engage, Context Reflective formative assessment involves engaging students in recalling and connecting what they already know to new learning. This process helps teachers gather evidence of students' current understanding, including misconceptions, to inform instruction and support learning progression. The suggested activities encourage students to actively participate and uncover interesting facts about their classmates (context), fostering engagement, and building a sense of community. ✓ Note on facilitating the Activating Prior Knowledge tasks: There are three options for <i>activating prior knowledge</i>. The teacher can select the most suitable method based on the available time and the unique needs of their students. This flexibility ensures that the activity is both effective and engaging for the class.

2. What clues helped you determine the truth and the lie?
3. What new insight did you gain from your classmate's discussion on team sports and Filipino? Did you discover anything new about the social benefits of team sports and Filipino games from your classmates?

Option 2: Would You Rather (40 minutes)

Instructions.

1. **Form a Circle:** Have all students sit or stand in a circle to encourage open communication.
2. **Explain the Game:** You will read out two options for each question. Students must select the option they prefer and explain their reasoning.
3. **Take Turns:** Go around the circle, giving each student a chance to answer and share their reasoning.
4. **Encourage Respectful Listening:** Remind students to listen carefully while others speak and to respond respectfully, even if they disagree.
5. **Promote Discussion:** After a few answers, invite students to discuss similarities or differences in their choices, emphasizing cooperation and understanding.
6. **Keep it Fun and Positive:** Encourage students to be honest and supportive throughout the activity.

Process Questions:

1. Which "Would You Rather" choice made you think most about teamwork? Why?
2. How did sharing your answers show the importance of communication in games?

✓ **Note on Facilitating the Two Truths and a Lie Task**

The teacher must remind the students of the following tips to make the activity fun, authentic, and interactive:

Tips for Playing:

1. Make your truths interesting but believable.
2. Deliver the lie confidently to make it harder to detect.
3. Listen carefully to others' statements.
4. Ask follow-up questions to get more information, if needed.
5. Have fun and be creative!

✓ **Note on Facilitating 'Would You Rather' Task:**

The teacher will pose a series of **"Would you rather"** questions to the group, encouraging students to explain their choices and engage in friendly debates.

Below are examples of **"Would You Rather"** questions that the teacher may use relative to the intended lesson objective. The teacher may incorporate relevant questions that students can personally relate to.

3. How can cooperation, communication, and respect help you in real team sports or Filipino games?

Option 3: Human Bingo (20 minutes)

The teacher will create bingo cards with various statements or characteristics (e.g., “Has traveled to another country,” “Plays a musical instrument”). Within 5 minutes, students mingle and try to find classmates who match the statements to fill their bingo cards.

Sample Human Bingo Card:

HUMAN BINGO CARD

Give someone a compliment today	Helped a classmate during an activity	Listening without interrupting during dance instruction	Follow all safety rules during physical or rhythmic activities
Waited patiently for one's turn in a game	Shared equipment or material with others	Encouraged a teammate who was feeling shy	Showed respect by being punctual and prepared for the activity
Said “please” to “thank you” during a game	Offered to help clean-up after an activity	Helped solve a disagreement respectfully	Gave someone a high five for their effort
Cheered for others during a rhythmic activity	Volunteered to lead or organize part of an activity	Adapted to changes in group plans or activities without complaint	<u>Took</u> responsibility for mistakes and apologized sincerely

Process Questions

1. What new things did you learn about your classmates during the game?
2. How did you feel when talking to different people, and what social skills did you use?
3. How can the skills you practiced in this activity help you in other situations?

2. Establishing the Purpose of the Lesson

Sample “Would You Rather” Questions

1. Would you rather be the captain of a basketball team or the leader in a game of Patintero?

(Focus: cooperation and communication styles)

2. Would you rather win a championship in volleyball with your classmates or win a traditional Filipino street game like Luksong Tinik with your family?

(Focus: teamwork, relationship building)

See Worksheet 1 (on Human Bingo)

✓ **Note to teacher:**

1. **Preparation:** Print enough bingo cards for each student. You can customize the statements to fit your class or activity.
2. **Facilitation:** Encourage students to interact with as many classmates as possible.
3. **Debrief:** Lead a short discussion using the reflection questions to reinforce the learning competency.

✧ **Instructional Design Framework (IDF) Mapping: 3Rs, Ideational, Formative Assessment**

Process questions after a class activity help students become **responsive, reflective, and relevant thinkers** by encouraging the students to respond thoughtfully to the experience,

	In today's lesson, we will explore how social skills like cooperation, communication, and respect play a crucial role in recreational and rhythmic activities. These skills help us work better with others, solve problems, and create a supportive atmosphere where everyone feels valued. For example, cooperating means working together towards a common goal, communicating involves sharing ideas clearly and listening attentively, and respect means appreciating others' differences and following agreed-upon rules. By practicing these skills in recreational and rhythmic activities, you not only improve your ability to participate effectively but also develop qualities that will benefit you in school, work, and everyday life. Remember, success in any group activity depends as much on how well we interact with others as on our talents.	analyze it deeply, and connect it to real-life situations or future learning. ✧ Instructional Design Framework (IDF) Mapping: 3Rs Establishing the lesson and its relevance is crucial because it aligns closely with the 3 Rs: being reflective, responsive, and relevant. When teachers introduce the lesson's purpose, students are prompted to reflect on why the topic matters, fostering deeper understanding and engagement.
B. Instituting New Knowledge	1. Presenting Examples Option 1: Motivational Scenario 1. Invite students to imagine this given scenario. <i>Imagine this scenario:</i> “Picture yourselves about to join a dance or sports team for a big school event. Each member brings different strengths, including being great communicators, some are fantastic at cooperating, and others always show respect, even when things get tough. Now, imagine trying to win as a team if everyone only focused on their moves, ignored each other, or didn't listen to instructions. Would the team succeed? Why or why not?” Option 2: Interactive Hook: Silent Line-up!	Instructional Design Framework (IDF) Mapping: 3 Rs, 4 Cs, 4 Es A. Motivational scenarios capture students' attention and invite them to respond meaningfully, reflect on their understanding and feelings, and see the value of the content in their own lives, by connecting it to their actual life experience B. The Interactive Hook and Silent Line-Up activity supports the 3Rs by encouraging students to be responsive through active engagement and adapting to peers' cues, reflective by thinking about their communication strategies and group dynamics, and relevant by connecting these skills to real-life interactions. They also enhance communication skills, especially nonverbal

	Objective: Students will practice non-verbal communication, cooperation, and respect by lining up in a specific order without speaking. Instructions. 1. Divide the students into groups of three. Each group will select one member to serve as the leader. 2. The goal is to line up in a specific order (for example, by birth month from January to December) without speaking or using any writing tools Reminders: • No talking, whispering, or mouthing words. • No writing or using electronic devices to communicate. • Only use gestures, facial expressions, or body language. • Respect each other’s personal space; no pushing or shoving. 3. Work together and be creative in how you communicate non-verbally in achieving your task as quickly as possible. 4. The teacher will give a signal to start and allow students time to organize themselves into the correct order. 5. Once students are in line, have each person state their order (e.g., say their birth month aloud) to verify accuracy. The quickest and most accurate team will win the round. Processing Questions: 1. How did your group communicate and work together silently, and what challenges did you face? 2. How did leadership and cooperation help your group, and how can you use these skills in other situations? 2. Discussing New Concept	communication, teamwork, and problem-solving, making learning meaningful and applicable beyond the classroom. In addition, the teacher will be using the Open-Ended Questions and Structured Reflection approach to encourage students to think critically, reflect on their strengths and challenges, and take responsibility for their progress. ✓ <u>Note to teacher on Motivational Scenario Activity:</u> Lead the students in discovering that just like in this scenario, success in any recreational or rhythmic activity-whether it’s a group dance, a team sport, or a fun class game-depends not only on individual talent but also on how well everyone uses social skills like cooperation, communication, and respect. ✓ <u>Note to teacher In playing Interactive Hook: Silent Line-up!</u> To ensure students understand the instructions, conduct a brief demonstration of the activity. Then list possible goals that are relevant and engaging to your students’ interests and experiences to make the activity more enjoyable and meaningful. Goal Example: “Your goal is to line up in order of your birth month, starting with January and ending with
--	--	--

	● Unlocking Difficulty: Sketch Up Word Maps Write “Recreation and Rhythmic Activities” in the center of your paper. 1. Draw lines from the center and add related words or ideas (types, benefits, examples). 2. Add smaller branches with details or examples for each main idea. 3. Use colors or drawings to make it clear and creative. 4. Review your map and be ready to share with the class. Process Questions 1. How does your map help explain the meaning of the term? 2. Did you find it easier to understand or remember the term after creating the map? Why? ● Lecture/Discussion (20 minutes) ❖ Recreation and Rhythmic Activities for Developing Social Skills ✓ <i>How do you think moving to a steady beat or rhythm can help improve your focus, mood, and teamwork skills?</i> I. Introduction Recreation and Rhythmic Activities are not only vital for physical health but also play a crucial role in developing appropriate social skills such as cooperation, communication, and respect. Through structured movement, music, and group participation, students learn to interact positively and build essential life skills. II. Recreation and Rhythmic Activities Defined	December. Remember, you must do this without talking or writing- only use non-verbal communication. When you think you’re in the right order, stand quietly and wait for everyone to finish.” Instructional Design Framework (IDF) Mapping: Engagement, Critical Thinking, Connection, Formative Assessment Word mapping encourages active participation, makes learning more engaging, and supports comprehension of technical terms, boosting motivation and independent learning. It provides a structured, interactive approach that effectively addresses vocabulary challenges by promoting meaningful connections and strategic word analysis Instructional Design Framework (IDF) Mapping: Ideational, Integrative, Relevant By creatively delivering the lecture, such as the use of the Socratic Method, we can encourage students to generate new ideas and integrate insights from other subjects, making the lesson more engaging and relevant.
--	---	--

A. Recreation involves activities done for enjoyment and relaxation during free time. These can be individual or group-based and often include sports, games, and creative arts.

Types of Recreation

Recreation can be classified in several ways, but the most common types include:

1. Active vs. Passive Recreation

Active Recreation:

Involves physical movement and exertion, such as sports, running, swimming, hiking, tennis, and cycling. These activities are usually done for exercise, competition, or adventure.

Passive Recreation:

Focuses on relaxation and leisure with minimal physical activity, such as reading, fishing, photography, picnicking, or nature walks.

2. Indoor vs. Outdoor Recreation

Indoor Recreation:

Activities done inside buildings, like chess, board games, baking, singing, or playing musical instruments.

Outdoor Recreation:

Activities performed outside, offering exposure to nature-such as camping, hiking, fishing, biking, kayaking, and nature walks.

A. Rhythmic Activities are movements or exercises performed in response to a regular beat or rhythm, often accompanied

by music, clapping, or singing. These activities help develop coordination, timing, creativity, and social skills.

Types of Rhythmic Activities

1. Fundamental Rhythms

These are basic movement patterns that help individuals develop a sense of rhythm and body coordination. Examples include: walking, running, skipping, hopping, marching, galloping

2. Creative Rhythms

Creative rhythms encourage self-expression and imagination. Participants use their bodies to imitate animals, objects, or characters, often inventing their movements to match a rhythm or story. Examples include:

- Imitating animals (e.g., moving like a bird or horse)
- Expressive movements based on imagination or themes
- Creating original dance steps

3. Dramatic Rhythm

Dramatic rhythms are based on stories, poems, songs, or emotions. These activities combine movement with storytelling or dramatization, allowing participants to interpret narratives through rhythmic motion. Examples include:

- Acting out a story or poem through movement
- Dance dramas
- Emotional expression through rhythmic movement

4. Structured Dance and Social Rhythmic Activities

	These are organized forms of rhythmic movement, often with set steps or patterns, performed individually, in pairs, or groups. Examples include: • Folk dances • Ballroom dances (e.g., waltz) • Line dancing • Popular social group dances 5. Aerobic Dance Fitness-oriented rhythmic movements set to energetic music Example: Dance Exercise III. How Recreation and Rhythmic Activities Foster Interpersonal Effectiveness and Social Competence A. Cooperation Many rhythmic activities require participants to move in sync or complete tasks as a group, such as folk dances or partner routines. Working together to maintain rhythm and timing teaches students to cooperate and support one another for group success. B. Communication Non-verbal cues, such as gestures and eye contact, are essential in recreation and rhythmic activities, especially when verbal communication is limited (e.g., during sign language games or synchronized dance). Group activities encourage students to listen, observe, and respond to others, enhancing both verbal and non-verbal communication skills. C. Respect	Note to the teacher: This topic can be delivered using the inquiry-based approach. The teacher can pose questions related to the previously completed activities, encouraging students to reflect on and deepen their understanding of how recreation and rhythmic activities foster the development of social skills. Thus, the teacher may opt to deliver this discussion in a more creative and fun way.
--	---	--

Respect is cultivated as students take turns, share space, and appreciate each other's abilities and contributions.

Activities like group singing or ensemble performances require students to value each participant's role, fostering a respectful and inclusive environment.

3. Developing Mastery

**Option 1: Sorting Game: Recreation & Rhythmic Activities
(10 minutes)**

I. Objective: Analyze and classify various recreational and rhythmic activities based on multiple criteria to deepen understanding of their characteristics and benefits.

II. Materials:

- Cards listing diverse recreational and rhythmic activities (include complex or less obvious examples, e.g., yoga, esports, ballroom dance, interpretive dance, hiking, meditation)
- Sorting areas labeled: Active/Passive, Indoor/Outdoor, and Rhythmic Activity Types (Fundamental, Creative, Dramatic, Structured Dance, Aerobic)

III. Instructions

1. Form small groups (3–5 students). Each group receives a mixed set of activity cards.
2. First round: Sort activities into Active or Passive.
3. Second round: Sort activities into Indoor or Outdoor. Consider activities that can fit both categories (e.g., running indoors on a treadmill vs. running outside).
4. Third round: Focus on rhythmic activities; categorize them into Fundamental, Creative, Dramatic, Structured Dance, or Aerobic. Groups justify their classifications with reasoning.
5. Critical Thinking Discussion:

**Instructional Design Framework (IDF)
Mapping:**

The Sorting Game activity encourages deeper analysis, **critical thinking**, and **application of knowledge to real-life choices**. It also promotes discussion on the nuances of recreation and rhythmic activities beyond simple definitions.

For the card listing diverse recreational and rhythmic activities, the teacher has the option to choose the most relevant outdoor and rhythmic activities familiar to his/her learners.
(Context)

See the sample activity card for reference:

Activity	Note for complexity/ discussions
Hiking	Outdoor, Active
Yoga	Can be Active or Passive; Indoor or Outdoor
Esports (competitive gaming)	Indoor, Passive or Active (mental activity)
Ballroom Dance	Structured Dance, Indoor, Active
Interpretive Dance	Creative or Dramatic Rhythm, Indoor or Outdoor
Meditation	Passive, Indoor
Swimming	Active, Indoor or Outdoor
Fishing	Passive, Outdoor
Aerobic Dance	Aerobic, Indoor, Active

	• Which activities fit multiple categories and why? • How do these classifications affect the benefits and social skills developed? • How can understanding these types help in choosing recreation for health and personal growth? 6. Group Presentation: Each group presents one complex example and explains its classification and benefits. <u>Option 2</u> Creative Task: Express the Social Power of Recreation & Rhythmic Activities I. Objective: Students will creatively express their understanding of the different types of recreation or a specific rhythmic activity and its contribution to developing social competence through poetry, rap, or artwork. II. Instructions: 1. Choose Your Focus: • Pick either: Different types of recreation (active/passive, indoor/outdoor) • One specific rhythmic activity type (e.g., creative rhythm, aerobic dance) 2. Create Your Work: • Write a short poem or rap that describes the chosen topic, highlighting key features and benefits. • OR create a drawing or visual artwork that illustrates the activities and their characteristics. 3. Prepare to Present: • Practice sharing your poem, rap, or artwork with the class. • Explain your creative choices and what you want your audience to understand about the topic. 4. Present to Class:	Instructional Design Framework (IDF) Mapping: Creative Task on <i>Expressing the Social Power of Recreation and Rhythmic Activities</i> encourages students to explore their capabilities while working collaboratively or individually. (Note: the teacher may have the option to make this activity an individual or group task). This activity is an integration of Community Engagement, Solidarity and Social Sciences, Filipino, English, Music and Arts. ✓ Remind the students to take note of the following tips for success: • Use vivid language and imagery in their poem or rap. • Make the artwork colorful and clear. • Think about how their creation can teach others about recreation or rhythmic activities and its benefits in improving interpersonal effectiveness and social relationships.
--	--	---

- Share your work confidently and listen to your classmates' presentations.

This suggested rubric may be used for the activity:

CREATIVE TASK RUBRIC: RECREATION AND RHYTHMIC ACTIVITIES

Criteria	Excellent (4)	Good (3)	Satisfactory (2)	Needs Improvement (1)
Content & Accuracy	Clearly and accurately illustrates/types of recreation or rhythmic activity all requirements met.	Mostly accurate; minor details missing	Some inaccuracies or missing elements	Lacks accuracy or relevance
Creativity & Originality	Highly creative, original, and engaging, shows unique perspective.	Creative and interesting, some original ideas	Some creativity; mostly standard or predictable	Lacks creativity; little original thought
Expression & Clarity	Message is clear and well-expressed, easy to understand	Mostly clear; message comes across	Somewhat unclear or confusing in parts	Difficult to understand or follow
Presentation	Well-prepared and confident; visuals or performance enhance message	Prepared presentation supports content	Somewhat prepared presentation is basic	Unprepared or presentation distracts
Effort and Completion	Task is fully completed; shows strong effort and attention to detail	Mostly complete good effort shown.	Partially complete; some effort shown	Incomplete, minimal effort

Process Questions:

1. How did you show the connection between recreational or rhythmic activities and social skills in your work?
2. What examples or experiences did you include to illustrate the impact on teamwork, communication, or friendships?
3. How did creating this poem, rap, or artwork help you understand the importance of recreation for building interpersonal effectiveness?

C. Demonstrating Knowledge and Skills

**1. Finding Practical Application
Option 1:**

The Rhythm Connection: Dance, Drama, and Cooperation
Task Overview:

**Instructional Design Framework (IDF)
Mapping:**

The Rhythm Connection promotes **inclusivity, creativity and collaboration**. It employs **differentiated instruction** by recognizing

	Dive into the exciting world of rhythmic activities by creating a vibrant, collaborative performance on the theme: “Rhythms of Identity: Keeping Culture Alive” Instructions: 1. Pick Your Rhythm Style Choose from these dynamic rhythmic activity types: ● <i>Fundamental Rhythms</i> (basic movements like walking, skipping, marching) ● <i>Creative Rhythms</i> (imaginative movements inspired by animals, stories, or themes) ● <i>Dramatic Rhythms</i> (expressive storytelling through rhythm and movement) ● <i>Structured Dance & Social Rhythms</i> (folk dances, line dances, partner routines) ● <i>Aerobic Dance</i> (energetic, fitness-focused dance moves) 2. Create Your Performance: ● Collaborate with your group to design a 2 to 3-minute routine that highlights your chosen rhythmic style(s). ● Incorporate elements of communication, cooperation, and respect as you plan and rehearse. ● Assign roles based on strengths-someone can lead the music, another can choreograph movements, while others ensure safety and timing. 3. Choose Your Stage: ● Perform your routine indoors or outdoors anywhere on campus. ● Make sure your space is safe and suitable for movement. ● Aim to make the experience fun, energetic, and inclusive for everyone involved! 4. Showcase & Reflect:	learners’ unique contexts and offering opportunities for them to showcase their skills through meaningful contributions in specific team roles. Teachers are allowed to tailor lessons to meet the diverse learning styles, readiness levels, and interests of individual students, ensuring that everyone can access and engage with the material effectively. This activity uses the Experiential Learning approach. It involves direct learning and reflection to further understand the benefits of engagement to Recreation and Rhythmic in enhancing interpersonal effectiveness and social competence. Integration of Music, Contemporary Arts, PE Social Science, and UCSP
--	--	---

- Present your rhythmic masterpiece to the class.
- After your performance, briefly share how your group worked together and what social skills you practiced during the process.

Suggested Rubric for this activity:

RUBRIC: The Rhythm Connection: Dance, Drama, and Cooperation

CRITERIA	4 – Exceeds Expectation	3- Meets Expectation	2 – Approaching Expectation	1 – Needs Improvement
Collaboration and Teamwork	All members contribute equally; group works seamlessly together, showing strong cooperation, communication and respect.	Most members contribute; group works well together, with minor lapses in cooperation and communication	Some members contribute; group has occasional issues with cooperation and communication.	Few contributes; group shows little cooperation or respect
Creativity and Interpretation	Performance is highly creative, original and expressive; strong use of dramatic and rhythmic elements	Performance is creative and expressive, good use of dramatic and rhythmic elements	Some creativity, limited use of dramatic or rhythmic elements	Lacks creativity, minimal use of dramatic or rhythmic elements
Movement and Rhythm	Movements are precise, well-coordinated, and clearly connected to rhythm/music; excellent use of space and timing.	Movements are coordinated and mostly on rhythm; good use of space and timing	Movements are sometimes off rhythm or uncoordinated; limited use of space	Movements lack rhythm, coordination or use of space
Expression and Engagement	Performers show strong facial expressions, energy and focus throughout, highly engaging	Performers are expressive and energetic most of the time; generally engaging	Some expression and energy; engagement varies	Little to no expression or energy; not engaging
Understanding of Social Skills	Performance clearly demonstrates cooperation and respect; group reflects on these skills presentation	Performers are expressive and energetic most of the time; generally engaging	Same expression and energy; engagement varies	Little to no expression or energy; not engaging
Understanding of Social Skills	Performance clearly demonstrates cooperation, communication and respect; group reflects on these skills presentation.	Performance shows social skills with some explanation/reflection	Social skills are present but not clearly demonstrated or explained	Social skills are NOT demonstrated or explained

Scoring:

20–18: Outstanding

17–15: Good

14–10: Satisfactory

9 and below: Needs Improvement

Note to the teacher on the use of the Rubrics:

The presented rubric serves as a sample; teachers are encouraged to customize its content and actively involve students in the rubric creation process to ensure it reflects their learning goals and promotes greater ownership.

	Feedback: • Strengths: • Areas to Improve: Process Question 1. How did your group use dance, drama, and cooperation to communicate your message or theme in the performance? 2. What challenges did you face while working together, and how did you overcome them? 3. In what ways did participating in this rhythmic activity help you develop social skills such as communication, respect, and teamwork? Option 2. Recreation Revolution: Your Blueprint for Community Fun” I. Objective: Students will apply their knowledge of types of recreation and rhythmic activities by planning a community event that includes both active/passive and rhythmic activities, considering indoor/outdoor settings and social benefits. II. Materials: Scenario handout (see below) Paper and pens or digital devices for planning Optional: props or visuals for presentations Scenario: <i>“Your community center wants to organize a “Fun and Healthy Day” event to promote physical activity, relaxation, and social interaction among residents of all ages. Your group has been tasked to design</i>	Instructional Design Framework (IDF) Mapping: Process questions provide formative assessment, checking students’ understanding of the activity. These reflective questions help students connect the activity to real-life scenarios and encourage proactive relationship building. Instructional Design Framework (IDF) Mapping: Introducing real-life scenario activities engages students by making learning relevant and practical. These activities encourage active participation, foster critical thinking, and help students apply concepts to everyday situations, enhancing both understanding and retention. Additionally, they promote problem-solving skills and collaboration, preparing
--	--	--

	<i>the event program, including a variety of recreational and rhythmic activities.”</i> III. Instructions: 1. Form groups of 4-5 students. 2. Analyze the scenario: • Identify different types of recreation (active/passive, indoor/outdoor) to include. • Choose rhythmic activities from the categories: fundamental, creative, dramatic, structured dance, and aerobic dance. 3. Plan the event program: • List at least 3 active and 3 passive recreation activities. • Include at least 2 rhythmic activities, specifying their type and why they are suitable. • Decide which activities will be indoors and which outdoors. • Consider the social and physical benefits of each activity. 4. Prepare a brief presentation: • Explain your choices and how the event promotes health, social skills, and enjoyment. 5. Present to the class: • Share your event plan and answer questions from peers. • Rubric for presentation Suggested Rubric for this activity:	students to navigate real-world challenges effectively. By actively involving learners (experience), scenario-based tasks improve retention and prepare students for challenges beyond school, making their learning more meaningful and effective. The teacher can adapt the scenario to suit their preferences and align it with the specific context of their students. Note to the teacher on the use of the Rubrics:
--	--	---

CRITERIA	Excellent (4)	Good (3)	Fair (2)	Needs Improvement (1)
Active Activities	All relevant, creative	All relevant	2 relevant	1 or nonrelevant
Passive Activities	All relevant, creative	All relevant	2 relevant	1 or nonrelevant
Rhythmic Activities	Both correct, explained	Both correct	1 correct	None or incorrect
Indoor/Outdoor Classification	All correct, justified	All correct	1-2 errors	Many errors
Benefits Explanation	Clear, insightful	Clear	Somewhat clear	Unclear or missing
Presentation	Engaging <u>clear</u> , organized	Clear organized	Somewhat clear	Unclear or disorganized

Processing Questions

1. How did your group choose and balance the different types of activities for the event?
2. What benefits do you think these activities will bring to the participants?
3. What challenges did your group face during planning, and what did you learn from working together?

Making Generalization

Option 1: Today's Take Away Ticket

1. How would you define recreation and rhythmic activities?
2. How can you apply a skill you learned today in real life?
3. Which concept in the lesson is currently the most difficult for you?
4. What is one idea that you understand 100% from today's lesson?

Option 2: 3-2-1 EXIT TICKET

The presented rubric serves as a sample; teachers are encouraged to customize its content and actively involve students in the rubric creation process to ensure it reflects their learning goals and promotes greater ownership.

Instructional Design Framework (IDF) Mapping:

The teacher collects the Exit Tickets from the students and may ask for permission to share a few responses anonymously. This ensures students' **privacy is respected and helps create a safe, supportive environment for open reflection without embarrassment.**

Exit Tickets are ways of making learning **reflective**. It is a creative way of letting the

	1. In a strip of paper, write down 3 things you learned during today's lesson. 2. Write down 2 questions you have about today's lesson. 3. Write down 1 thing you need more help with from today's lesson. 3. Evaluating Learning <i>In this step the learners are assessed to determine the level of their understanding and skill acquisition. This may include written activities, performance tasks, or other check-in activities. This must be aligned to unit summative assessment.</i> Option 1: PERMAH Reflection Gallery 1. Form small groups and start at one of the six PERMAH stations: Positive Emotions, Engagement, Relationships, Meaning, Achievement, Health. 2. Discuss and write your group's thoughts on how the recreation and rhythmic activities related to the station's theme. 3. Rotate to the next station every 3–4 minutes until all groups have visited each station. 4. Walk around to read other groups' reflections and add comments if you want. 5. Discuss as a class: a. Which PERMAH elements did you experience most? b. How did these activities improve your social skills and relationships? Option 2: Complete Me!	students recognize what they have learned and their difficulties. In addition, exit tickets serve as a formative assessment tool designed to gauge students' understanding of a lesson's key concepts and learning objectives. They provide immediate feedback to teachers about what students have grasped and identify areas needing further clarification or support. Instructional Design Framework Mapping: The PERMAH reflection gallery helps students reflect on the six pillars of well-being-Positive Emotions, Engagement, Relationships, Meaning, Accomplishment, and Health. It promotes self-awareness, personal growth, and positive mental health by connecting these concepts to their own lives, supporting resilience and overall well-being. By checking each other's feelings, through verbal and non-verbal communication, students learn to be more empathetic. Integration of subject areas, such as Personal Development, GMRC, Values Education, and Social Sciences, is observed in this task.

Complete the sentences below to show what you learned from today's lesson on Participating Effectively in Recreational and Rhythmic Activities:

1. I feel most confident participating in rhythmic activities when _____.
2. One important skill I learned today about teamwork is _____.
3. During the recreational activity, I helped my team by _____.
4. I found it challenging to _____, but I improved by _____.
5. Participating in these activities helps me develop _____ that I can use outside of class.

✓ Share the answer with the class

4. Additional Activities

These are enrichment, reinforcement, or remediation activities designed to support diverse learners. These can be extension work, research tasks, or differentiated exercises.

Activity: Rhythm Circle Relay

✓ **Note to teacher:**

The teacher may prepare some sticky notes for the PERMAH Reflection Gallery.

Instructional Design Framework (IDF) Mapping:

Complete Me task guides learners to **reflect and respond** thoughtfully.

	I. Objective To enhance cooperation, active listening, and respectful communication through a fun, rhythmic and recreational group challenge. II. Materials • Small percussion instruments (e.g., tambourines, shakers, sticks) or improvised items (e.g., plastic bottles, clapping, snapping) • Open space for forming a circle III. Instruction: 1. Form groups of 6–8 and sit or stand in a circle. 2. The teacher starts a simple rhythm (e.g., clap, clap, snap). 3. Each student repeats the rhythm and adds a new sound or movement. 4. Help each other if someone forgets the pattern. 5. After several rounds, discuss how teamwork helped you. Process Questions: 1. How did working together to remember and pass the rhythm help your group communicate better? 2. What strategies did your group use to support each other when someone forgot the rhythm?	Instructional Design Framework (IDF) Mapping: The Rhythm Circle Relay is relevant because it connects learners to familiar cultural practices of music and dance, making social skill development meaningful. It promotes inclusivity by allowing all students to participate using different ways to express rhythm, regardless of ability. The activity also fosters empathy as students listen, support, and respond to each other’s patterns, helping them understand and care for their peers. There is an integration of Music and Oral Communication
V. ASSESSMENT <i>(Assessing Learnings)</i>		

Option 1: Multiple Choice Quiz: Recreation and Rhythmic Activities for Social Skills

Directions: Choose the letter of the correct answer.

1. Which of the following is an example of active recreation?
 - A. Fishing
 - B. Swimming
 - C. Photography
 - D. Reading a book

2. Which activity is classified as passive recreation?
 - A. Hiking
 - B. Playing tennis
 - C. Picnicking
 - D. Running

3. Which of the following is considered an indoor recreation activity?
 - A. Biking
 - B. Camping
 - C. Kayaking
 - D. Playing board games

4. What is a key characteristic of rhythmic activities?
 - A. They focus solely on relaxation
 - B. They require no physical movement
 - C. They involve only individual competition
 - D. They are performed in response to a regular beat or rhythm

5. Which of the following is an example of a fundamental locomotor movement in dance?
 - A. Skipping
 - B. Aerobic dance
 - C. Ballroom dancing
 - D. Acting out a story through movement

6. During a group folk dance, one member is struggling to keep up with the rhythm. What is the best way for the group to support this member while maintaining cooperation?
- A. Stop the dance and start over repeatedly.
 - B. Ignore the member and continue dancing.
 - C. Ask the member to sit out to avoid disrupting the group.
 - D. Encourage the member gently and adjust the pace to help everyone stay together.
7. During an outdoor recreation activity, your team needs to complete a relay race. Which social skill is most important to ensure success?
- A. Running ahead without waiting for others.
 - B. Competing aggressively against teammates.
 - C. Ignoring team strategy to focus on personal speed.
 - D. Cooperating, encouraging each other, and communicating clearly.
8. After a group recreation game, your team reflects on what went well. Which reflection shows good understanding of social skills?
- A. "We all worked together and communicated well, which helped us succeed."
 - B. "Respect wasn't important as long as we played hard."
 - C. "Only the fastest players mattered in winning."
 - D. "We didn't need to listen to each other."
9. If your group is doing a line dance and one member accidentally steps out of line, how should the group respond to maintain respect and teamwork?
- A. Stop the dance and scold the member.
 - B. Laugh at the member to lighten the mood.
 - C. Continue without acknowledging the mistake.
 - D. Politely help the member get back in sync without blaming.
10. Your group is performing a dramatic rhythm based on a poem. To improve communication and cooperation, what should you focus on?
- A. Performing individually without interaction
 - B. Avoiding eye contact to stay focused on your part
 - C. Memorizing lines without paying attention to others' movements
 - D. Coordinating your movements with your teammates and using facial expressions

ANSWERS KEY

- | | |

| 1. B | 6. D |
| 2. C | 7. D |
| 3. D | 8. A |
| 4. D | 9. D |
| 5. A | 10. D |

Option 2: Activity: Social Skills in Motion: Your Infographic Challenge**Task Overview**

Create an original infographic that visually explains how recreation and rhythmic activities enhance social competence and interpersonal relationships. Your infographic should be informative, visually engaging, and easy to understand for your peers.

Steps**1. Research and Plan**

- Review your notes and reliable sources about recreation and rhythmic activities.
- Identify key points: definitions, types, benefits, and examples of social skills developed.

2. Select a Focus

- Choose a specific aspect or benefit (e.g., teamwork in folk dance, respect in group games, communication in aerobic routines).
- Decide on your main message or thesis for the infographic.

3. Design Your Infographic

- Use a digital tool (like Canva, Piktochart, or Venngage) or draw by hand.

Include:

- ✓ A catchy title
- ✓ Brief explanations or facts
- ✓ Visual elements (icons, charts, images)
- ✓ At least one real-life example or scenario
- ✓ Clear organization and flow

4. Peer Review

- Exchange drafts with a classmate for feedback on clarity, accuracy, and design.
- Revise your infographic based on suggestions.

	5. Submit and Present • Submit your final infographic. • Present your infographic to the class, explaining your design choices and key takeaways. Criteria for Success ✓ Accurate and relevant information – 5 pts ✓ Creative and clear visual design – 5 pts ✓ Effective communication of how recreation/rhythmic activities build social skills – 5 pts ✓ Inclusion of real-life examples or scenarios – 5 pts ✓ Organized, easy-to-follow layout -5 pts Note to the teacher on the use of the Rubrics: The presented rubric serves as a sample; teachers are encouraged to customize its content and actively involve students in the rubric creation process to ensure it reflects their learning goals and promotes greater ownership.
VI. REFLECTION <i>(Feedback and Continuous Improvement)</i>	<i>This section presents the key highlights and challenges encountered by both teachers and learners during the teaching-learning process throughout the unit. It also includes the adjustments made by the teacher to improve instruction.</i> Option 1: Walk and Talk Reflection 1. Find a partner and stand side by side. 2. We will walk slowly around the activity area or gym while discussing the question I give you. 3. As you walk, take turns sharing your thoughts and listening carefully to your partner. 4. Use positive language and show respect by allowing your partner to finish speaking before you respond. 5. Discuss this question: “How did participating in the rhythmic and recreational activities today help you work better with others and build your social skills?” 6. Walk and talk for about 1–2 minutes, then we will come back together as a class to share some of your ideas. 7. Remember, this is a chance to reflect on your experience and learn from each other, so be open and honest. Process Questions 1. What specific social skills did you practice during the rhythmic and recreational activities that helped you work better with others?

	2. How did working with others in these activities change the way you communicate or cooperate in a group?
--	---

Option 2: Reflection Journals

- | | |
|--|---|
| | <p>1. Students will answer these reflection journal prompts:</p> <ul style="list-style-type: none">• “Describe a moment during today’s activities when you felt connected to others. What social skills did you use?”• “How can the social skills practiced today help you in other areas of your life?” |
|--|---|
