LEARNING ACTIVITY SHEET

Learning Area:	General Science	Quarter:	1
Lesson No.:	8.2	Date:	
Lesson Title/ Topic:	Utility of Electricity Energy Efficiency Practices		
Name:		Grade & Section:	

I. Activity No. 1: Power Patrol

II. Objective(s): At the end of the activity, you should be able to identify energy wasting habits and evaluate their impact.

III. Materials Needed: pen and paper, Power Patrol Checklist

IV. Instructions:

1. This is a two-phased activity. Wait for the instruction from your teacher when to accomplish each phase.
2. For the Phase 1: Inspection, carefully inspect your assigned area for inefficient energy use/habits. As you conduct your inspection, document any observed habits by taking clear and relevant photos. Make sure each photo corresponds to specific items on the checklist to ensure accurate and organized reporting of your findings.
3. For Phase 2: assess the energy waste level of the identified habits. Recommend actions and identify the responsible person.

Refer to this guide for the energy waste level rating:

Low- Minimal impact on overall energy consumption. Can be addressed with simple behavioral changes.

Medium- Noticeable impact on energy bills and efficiency. Requires moderate intervention or habit adjustments.

High- Significant energy waste that leads to excessive resource consumption and increased costs. Needs urgent corrective action.

Phase 1		Phase 2		
Inspection Item	Phot Documentation	Energy Waste Level (Low/ Medium/ High)	Recommended Action	Responsible Person
Electricity Use				
☐ Lights left on in empty rooms				
☐ Windows covered when natural light is available				
☐ Electric devices left on when not in use				
☐ Overlit areas				

☐ Inefficient lighting (Use of incandescent instead of fluorescent/LED)				
Ventilation				
☐ Electric fans running unnecessarily				
☐ Doors/windows left open while AC is on.				
☐ Improper maintenance of ventilation (unclean fans/ AC)				
Water				
☐ Faucets left running unnecessarily				
☐ Leaking faucets				
☐ Damaged water pipes				
Other inefficient practice on the use of electricity				

Power Patrol Checklist adapted and modified from <https://www.ecohedge.com/blog/10-energy-efficiency-checklist-items-for-smes/>

Guide Questions:

1. What were the most common energy-wasting habits observed during your inspection?

2. Were there any surprising findings you didn't expect?

3. What simple habits can you do to minimize unnecessary energy consumption?

4. How can schools encourage behavioral changes to create a culture of energy conservation in the school?

V. Synthesis:

1. How did you arrive at your answers?

2. How did you find the activity? Can you share and describe your experience?
