LESSON EXEMPLAR

Learning Area	EFFECTIVE COMMUNICATION	Grade Level	11
Semester	2 nd	Quarter	3 rd

I. OBJECTIVES	
A. Content Standard	The learners demonstrate effective communication in academic and training contexts through spoken, written, and multimodal forms ; they understand that interaction patterns in academic and training contexts are formal, structured, and discipline-specific, and that intellectual integrity, honest and respectful critique, and inclusive language foster meaningful academic and training engagement.
B. Performance Standard	The learners produce spoken, written, and multimodal academic and technical texts for specific purposes and audiences , such as, but not limited to, articles, research reports, public speaking presentations, reviews, and podcasts; prepare note cards and reference lists in support of these texts; convert these texts into presentation formats aided by non-verbal signals and multimedia tools or resources; and give and use feedback on the content, structure and language of communication to improve performance.
C. Communicative Event/s	Collaborating in group presentations or peer feedback workshops
D. Learning Competencies	• Employ appropriate strategies in understanding unfamiliar vocabulary, including specialized terminology. • Collaborate on academic and technical tasks (e.g., project proposals, technical reports, lectures, manuals). • Explain concepts using appropriate academic and technical vocabulary and language, and multimodal representations (e.g., diagrams, graphs, charts, infographics). • Describe processes of interpretation, engagement, and expression used for communication in academic and training contexts

III. CONTENT	Collaborative Communication and Summarizing Key Information
IV. OBJECTIVES	At the end of the lesson, the learners are expected to: 1. recall prior knowledge or beliefs about collaboration and summarizing in academic contexts; 2. identify the relevance of summarizing and collaborative communication in academic and workplace settings; 3. explain key strategies for interpreting vocabulary and collaborating effectively using structured tools; 4. analyze models of summaries or presentations to determine effective use of academic language and multimodal tools; 5. apply vocabulary strategies and summarizing skills collaboratively to academic or technical texts; 6. present a summarized academic/technical text using appropriate academic vocabulary, multimodal tools, and collaboration, then give and receive peer feedback using a rubric; 7. demonstrate summarizing and communication strategies in real-world or professional task simulations; and 8. reflect on strategies used during collaboration, summarizing, and communication activities.

IV. PROCEDURES		ANNOTATIONS
A. Activating Prior Knowledge	<u>A1. ACTIVATING PRIOR KNOWLEDGE</u> OPTION A: THINK-PAIR-SHARE Teacher Instructions: 1. Ask students, “When was the last time you worked on a group task? What made it successful or challenging?” 2. Give students one minute to think about their responses. 3. Instruct them to pair up and share their answers. 4. Call on a few volunteers to share their ideas with the class. Processing Questions: 1. What communication challenges did you face in your last group task? 2. What strategies helped your group succeed? 3. How can you apply that experience to today’s activity? OPTION B: VOCABULARY WEB Teacher Instructions: 1. Write the term “SUMMARY” or “COLLABORATION” on the board. 2. Ask students to brainstorm words or ideas related to the term. 3. Record their responses and organize them into a concept web on the board. Processing Questions: 1. Which of these terms do you already understand well? Which are new? 2. Why do you associate these words with “summary” or “collaboration”? 3. How do these words help us understand today’s topic? OPTION C: TO SUMMARIZE OR NOT? Teacher Instructions: 1. Read each situation carefully. These describe different kinds of texts or communication tasks you may encounter in school or daily life. 2. In the “Need to Summarize?” column, check the box that best applies: YES. If you think the text or situation requires summarizing NO. If summarizing is unnecessary because the text is already short, direct, or complete.	The activity is designed to be responsive, respecting students varied personal experiences. It is also tailored to adjust to their different communication backgrounds, ensuring that each learner can engage meaningfully. Additionally, the activity is reflective, encouraging students to develop self-awareness of their past learning and experiences. Metacognitive – Helps students make connections to prior knowledge Differentiated – Supports visual learners Goal-Oriented – Establishes focus on key lesson terms Critical Thinking – Requires reasoning and justification Contextualized – Relates to student preferences and habits Tailored – Reveals learners’ readiness for new concepts

	3. In the “Reason/Explanation” column (see Appendix 1), write one or two sentences explaining your choice. Answers: <table><tr><td>1. Yes</td><td>6. No</td></tr><tr><td>2. No</td><td>7. Yes</td></tr><tr><td>3. Yes</td><td>8. No</td></tr><tr><td>4. No</td><td>9. Yes</td></tr><tr><td>5. Yes</td><td>10. No</td></tr></table> Processing Questions: 1. Why did you choose that corner? 2. How does your opinion relate to your own learning habits? 3. Do you think summarizing is useful in group communication? Why? <u>A2. Establishing the Purpose of the Lesson</u> OPTION A: REAL WORLD SCENARIO SLIDE Teacher Instructions: 1. Present a slide showing a workplace scenario (e.g. a meeting summary, email report). 2. Ask, “What skills are being used here? Why is summarizing important in this context?” Processing Questions: 1. In what real-life situation would this communication skill be useful? 2. What would happen if this summary or report were poorly done? 3. How is this similar to what you will be doing in your presentation? OPTION B: MINI INTERVIEW VIDEO Teacher Instructions: 1. Show a one-to-two-minute video of a professional explaining how teamwork and clear communication are essential. 2. Ask, “What strategies did the speaker mention? How are these relevant to us?” Suggested Video Link: https://www.youtube.com/watch?v=QGHBq5OEsBM	1. Yes	6. No	2. No	7. Yes	3. Yes	8. No	4. No	9. Yes	5. Yes	10. No	Leverage points are used to tap into learners’ experiences and cultural or academic relevance. This increases engagement and builds bridges between prior knowledge and new learning. Career-aligned: connects learning to actual job tasks Real-world: demonstrates relevance beyond the classroom Goal-oriented: sets the tone for the performance task Technology-integrated: leverages multimedia Career-aligned: shows authentic application of communication skills Responsive: uses engaging, modern resources
1. Yes	6. No											
2. No	7. Yes											
3. Yes	8. No											
4. No	9. Yes											
5. Yes	10. No											

	1. Play a short video clip of a student group presentation. 2. Ask students to jot down: • Strengths of the presentation • Areas to improve 3. Facilitate a short discussion Suggested Video: Sample Group Presentation: Nonverbal Communication https://www.youtube.com/watch?v=8zOniRgF330&t=132s Processing Questions: 1. What parts of the presentation were most clear or memorable? 2. How did the group show effective collaboration? 3. What techniques can you use in your own presentation? OPTION C: INFOGRAPHIC ANALYSIS Teacher Instructions: 1. Present a clear infographic (see <i>Appendix 3</i>) summarizing data. (e.g., environmental issues, health statistics). 2. Ask: “What makes this effective? What information is emphasized? How is it organized?” Poster Link: https://cdn.who.int/media/images/default-source/environmental-health/phe-prevention-diseases-infographic-en-3-1200px.png?sfvrsn=2f6cc3d4_12 Processing Questions: 1. What makes it visually clear and informative? 2. How does the infographic help the audience understand key ideas? 3. How could you use this format in your own presentation? <u>B.2 Discussing New Concept</u> OPTION A: CONCEPT MAPPING Teacher Instructions: 1. On the board or projector, start a concept map on “Effective Group Collaboration.” 2. As students suggest strategies or terms (e.g., clarifying, turn-taking), add them to the map.	communication styles. By identifying poor strategies and suggesting improvements, they engage in low-stakes counter-argument practice—especially useful in building evaluative thinking. Technology-integrated: uses video modeling Responsive: supports auditory and visual learners Reflective: builds evaluative skills for peer feedback Visual, Differentiated: supports learners who prefer visual presentation Real-World: reflects communication formats in careers Metacognitive: builds awareness of effective information design Metacognitive: encourages structured thinking Goal-oriented: Aligns with performance expectations
--	---	--

	2. Have each student read, summarize, and teach their section to the rest of the group. 3. Guide the group to collaboratively create a complete summary combining all sections. Processing Questions: 1. What was challenging about summarizing your section? 2. How did each group member contribute to understanding the full text? 3. How does this activity prepare you for group presentation? OPTION B: COLLABORATIVE VOCABULARY POSTER Teacher Instructions: 1. Assign each group five technical terms. 2. Ask them to define each term, add an illustration, and use it in a sample sentence on a digital or physical poster. 3. Display the posters and conduct a gallery walk for sharing and feedback. 10 Technical Terms for Collaborative Vocabulary Poster 1. Collaboration – The act of working jointly with others to achieve a common goal. 2. Summarization – The process of condensing information by identifying and presenting only the main ideas. 3. Multimodal – Involving or using multiple modes of communication (e.g., text, visuals, audio). 4. Constructive Feedback – Comments intended to help improve performance, usually specific, respectful, and task-focused. 5. Clarification – A strategy used to make a message clearer or to ensure mutual understanding. 6. Paraphrasing – Restating information in your own words while retaining the original meaning. 7. Infographic – A visual representation of information or data intended to make content easier to understand. 8. Interpretation – The act of explaining or giving meaning to information, language, or text. 9. Engagement – Active involvement or participation in a communication or learning process. 10. Presentation – A structured format of delivering information, usually orally and often supported with visuals or media. Faded Scaffolds: Students are initially guided with clear steps (group roles, structured prompts, sentence starters). As they progress, these supports are gradually removed, encouraging independence in vocabulary use, summarizing, and collaboration—classic faded scaffolding technique. Technology-integrated: uses digital creation tools Relevant: builds professional vocabulary Reflective: encourages careful word use
--	---

Processing Questions:

1. How did your group decide on the definitions or visuals?
2. Why is it important to know these terms for your task?
3. How will these words help clarify your presentation?

OPTION C: “SUMMARIZE THIS!” GAME

Teacher Instructions:

1. Distribute a short paragraph to each group.
2. Challenge students to write three summaries of the paragraph:
 - A 1-sentence summary
 - A 3-sentence summary
 - A 5-sentence summary
3. Have groups compare their summaries and discuss which version is the most effective and why.

SAMPLE TEXT: The Role of Communication in Team Success

In any professional or academic setting, successful teamwork depends heavily on clear and respectful communication. Teams that communicate effectively are able to share ideas, divide responsibilities, and make decisions faster. When members listen actively and give constructive feedback, conflicts are reduced, and productivity increases. Poor communication, on the other hand, often leads to misunderstandings, duplicated tasks, or missed deadlines. As a result, developing strong communication skills—such as summarizing key points, clarifying instructions, and using appropriate tone—is essential for collaborative success.

Sample Student Summaries:

- “Teamwork improves with clear, respectful communication, active listening, and effective feedback to avoid conflict.”
- “Good communication builds strong teams by preventing errors and improving collaboration and productivity.”
- “Teams succeed when members listen, share, and give feedback using clear and respectful communication.”

Metacognitive: builds precision in summarizing
Goal-oriented: trains for presentation prep
Differentiated: students choose depth of detail

Deliberate Practice: Students repeatedly practice targeted skills (summarizing, vocabulary application, group discussion), with increasing complexity and immediate feedback. This focused repetition aligns with the deliberate practice model.

	Processing Questions: 1. What differences did you notice between the one-, three-, and five-sentence versions? 2. Which summary best captured the key ideas, and why? 3. Which summary length do you think is most suitable for your task?	
C. Demonstrating Knowledge and Skills	<u>C.1 FINDING PRACTICAL APPLICATION</u> OPTION A: CAREER SIMULATION Teacher Instructions: 1. Set the context by telling students: “You are junior employees reporting on a site visit.” 2. Have each group prepare a short oral report that summarizes the key findings from the site visit. Processing Questions: 1. How is this task similar to real-life communication in your strand? 2. What skills did your group use to organize and present your update? 3. How did your role in the group reflect an actual job responsibility? OPTION B: SOCIAL MEDIA SUMMARY Teacher Instructions: 1. Provide students with a technical text. 2. Have students create summaries in different formats: • A tweet (up to 280 characters) • An Instagram or Facebook caption • A short video script <i>The Impact of Digital Collaboration Tools in the Workplace</i> Digital collaboration tools such as Slack, Microsoft Teams, Zoom, and Google Workspace have transformed how modern teams communicate and work together. These platforms allow real-time messaging, video conferencing, document sharing, and task tracking, reducing delays and increasing efficiency in project management. They also support asynchronous communication, enabling global teams to collaborate across different time zones. However,	Career-aligned: realistic simulation Contextualized: task feels authentic Critical Thinking: requires content selection and organization Technology-integrated: reflects modern platforms Relevant: connects to real communication channels Goal-oriented: teaches clear, concise messaging

overreliance on these tools may lead to “communication overload,” where employees feel overwhelmed by constant notifications and digital noise. To maximize productivity, organizations must implement communication protocols, encourage healthy boundaries, and train employees to use tools strategically.

Processing Questions:

1. How did you choose what information to keep or cut?
2. Why is concise communication important on social media and in real life?
3. How would you adapt your summary for a formal presentation?

OPTION C: MOCK TEAM MEETING

Teacher Instructions:

1. Groups role-play a team meeting.
2. After the role-play, the members from other groups need to summarize and share with the class the summarized report.
3. Use real-world prompts (e.g., health report, marketing analysis).

Processing Questions:

1. What communication strategies did your team use to stay organized?
2. How did your summary support the goal of the meeting?
3. How would you improve your delivery in a real setting?

C.2 MAKING GENERALIZATION

OPTION A: SENTENCE STARTERS

Teacher Instruction:

1. Display the following sentence stems:
 - “I learned that to summarize well, you should...”
 - “Collaboration works best when...”
2. Have students complete the stems either in writing or by sharing their responses orally.

Processing Questions:

1. What did you learn about summarizing or collaborating?
2. How does completing this sentence help you reflect on your learning?
3. What would you do differently in your next group task?

Real-world: mirrors team communication
Reflective: learners evaluate clarity
Tailored: prompts matched to student strand

Reflective: promotes personal insights
Goal-oriented: encourages focus on learning process
Metacognitive: articulates learning strategies

	OPTION B: ONE-MINUTE PAPER Teacher Instructions: 1. Ask students to write for one minute in response to the prompt: • “What’s the most important takeaway from today?” 2. Invite a few students to share their responses with the class. Processing Questions: 1. What is the most valuable skill you practiced today? 2. How did this activity help prepare you for the presentation? 3. What would you still like to improve? OPTION C: EXIT TICKET CHART Teacher Instructions: 1. Distribute an exit ticket with three columns: • Strategy I Used • What Worked • What I Will Improve Next Time 2. Collect and review for planning tomorrow’s session. Processing Questions: 1. Which strategy was most effective to you? 2. What will you continue doing in your next collaborative task? 3. What adjustments will you make based on your group’s experience? <u>C.3 ADDITIONAL ACTIVITIES</u> OPTION A: FEEDBACK LANGUAGE BANK Teacher Instructions: 1. Have students brainstorm helpful phrases for giving peer feedback. 2. Compile the phrases as a class resource, either in print or digital format, for future use. Processing Questions: 1. Why is giving constructive feedback important? 2. Which phrases feel natural for you to use, and which are more challenging? 3. How can these expressions enhance communication with your peers?	Tailored: brief, accessible for all levels Metacognitive: encourages self-awareness Critical Thinking: forces synthesis of learning Responsive: informs future teaching Reflective: builds growth mindset Goal-oriented: promotes continuous improvement Advanced Metacognition: Students reflect on how they processed vocabulary, collaborated, and communicated. These reflective prompts push them beyond content recall into evaluation of their thinking processes.
--	---	--

OPTION B: CHECKLIST DESIGN**Teacher Instructions:**

1. Ask each group to design a checklist addressing the question: "What makes a good group presentation?"
2. Later, compare their checklists with the official rubric to highlight similarities and differences.

Processing Questions:

1. What criteria are most important for delivering a strong group presentation?
2. How does using a checklist help your team stay focused?
3. What would you add to your checklist after completing a presentation?

OPTION C: PEER CRITIQUE SIMULATION**Teacher Instructions**

1. Show a sample presentation or recording to the class.
2. Have students practice giving feedback using the rubric as a guide.

SAMPLE RUBRIC:

Criteria	4 – Excellent	3 – Proficient	2 – Developing	1 – Needs Improvement
Content Accuracy and Relevance	Information is accurate, well-researched, and clearly connected to the topic. Evidence supports all key points.	Information is mostly accurate and relevant, with minor gaps or unclear connections.	Some information is inaccurate or loosely related to the topic.	Information is inaccurate, incomplete, or irrelevant.
Organization and Clarity	The presentation is well-structured and flows	Presentation is organized but may have minor lapses in	Some organization is evident, but transitions	The presentation lacks clear structure and

Tailored: prepares all learners for peer workshops
Reflective: promotes constructive dialogue
Career-aligned: teachers' polite professional interaction

Metacognitive: helps students evaluate work
Critical Thinking: defines quality criteria
Goal-oriented: directs focus on success

Reflective: builds feedback skills
Technology-integrated: uses digital sample
Relevant: immediate practice for peer workshop.

		logically. Transitions are smooth and ideas are easy to follow.	flow or clarity.	and clarity need improvement.	is difficult to follow.	
	Delivery and Engagement	The voice is clear, confident, and expressive. Eye contact, gestures, and pacing effectively engage the audience.	Delivery is clear and audible with occasional lapses in confidence or engagement.	Delivery is somewhat hesitant or uneven; limited audience connection.	Delivery is unclear, monotonous, or disengaged.	
	Use of Visuals/Supporting Materials	Visuals or materials are creative, clear, and effectively support key points.	Visuals or materials are relevant but may not be used consistently or effectively.	Visuals or materials are used but lack clarity or connection to main ideas.	No visuals or materials are used, or they distract from the presentation.	
	Feedback Quality (for Peer Critique)	Feedback is specific, constructive, and includes both strengths and suggestions for improvement.	Feedback is mostly specific and constructive, with some general comments.	Feedback is vague or lacks clear suggestions for improvement.	Feedback is incomplete, overly critical, or unhelpful.	

	Processing Questions: 1. How did it feel to evaluate someone else's work? 2. Which feedback was easiest to give, and which was the most challenging? 3. How will this practice help you during the actual peer feedback workshop?	
V. ASSESSMENT	A. PEN-AND-PAPER TEST Directions: In your notebook, read the following questions carefully and choose a letter that corresponds to your answer. 1. What is the main purpose of summarizing a text? A. To copy the exact words of the author. B. To add new ideas to the text. C. To condense the main ideas using your own words. D. To explain each sentence in detail. 2. Which of the following is a characteristic of effective collaborative communication? A. Interrupting others to express strong opinions. B. Working alone to avoid conflict. C. Listening actively and contributing respectfully. D. Avoiding eye contact during group work. 3. What role is responsible for keeping the group focused on time and schedule? A. Leader B. Timekeeper C. Presenter D. Recorder 4. Which strategy is MOST helpful when trying to understand unfamiliar academic or technical vocabulary? A. Using context clues from surrounding words B. Skipping the word and moving on C. Memorizing random definitions D. Ignoring the sentence completely	

5. What is the best reason for using multimodal communication (e.g., infographics, slides) during a presentation?
- A. To make the presentation longer.
 - B. To clarify and support verbal explanations.**
 - C. To replace verbal communication entirely.
 - D. To impress the audience with flashy visuals.
6. Which of the following best defines “constructive feedback”?
- A. Telling someone their work is bad.
 - B. Giving personal opinions about someone’s behavior.
 - C. Offering suggestions respectfully to help improve a task.**
 - D. Staying silent to avoid hurting others’ feelings.
7. What does it mean to paraphrase?
- A. Translate the text into another language.
 - B. Restate the information in your own words.**
 - C. Write the text exactly as written.
 - D. Remove important details from the original.
8. Which of these actions helps promote group accountability?
- A. Blaming one person for the group’s mistake.
 - B. Having no assigned roles.
 - C. Sharing responsibilities and checking progress.**
 - D. Allowing one person to do all the work.
9. During a peer feedback workshop, what should you focus on?
- A. Personal traits of the presenter.
 - B. Giving only praise to avoid conflict.
 - C. Strengths and suggestions related to content and delivery.**
 - D. Scoring your classmates secretly.
10. Why is summarizing important in collaborative settings?
- A. It increases word count.
 - B. It makes the work more confusing.
 - C. It helps group members understand key information clearly.**
 - D. It replaces the need for presentations.

Teacher’s Note: *The answers to the Pen-and-Paper Test are indicated in bold.*

VI. REFLECTION

VII. USE OF GENERATIVE AI

B. PERFORMANCE TASK: SUMMARIZE AND PRESENT (MAKING TECHNICAL TEXTS CLEAR)

Present the objective:

In groups, you will read and analyze a technical text, summarize the key information using your own words, and present it using a visual aid (infographic, slide, or chart). You will also give and receive peer feedback during a workshop.

Discuss the following steps to follow:

- 1. Form a group (3-5 members), then assign each member a role. Leader, Timekeeper, Recorder, Vocabulary Master, Presenter.
- 2. You will be given a technical text to read. Work together to identify key points and unfamiliar vocabulary.
- 3. Summarize the text. Use your own words and limit your summary to 3-5 sentences or a short paragraph. See sample text in Appendix 7.
- 4. Create a visual aid. Use multimodal format (infographic, slide, chart, graphic organizer). It must include, summary, keywords with definitions, and one to two visuals that support understanding.
- 5. Present your work. Each group will be given three to five minutes to present. Explain your summary and the choices behind your visual design. Speak clearly, share responsibilities, and use academic/technical vocabulary.
- 6. Grade the presentations using the rubric provided in Appendix 8.
- 7. Give and receive feedback from other groups. Use a structured feedback form (see Appendix 9).

Capstone Project: This culminating task synthesizes all skills taught: summarizing, vocabulary interpretation, visual communication, and collaboration. It is authentic, complex, and mirrors workplace communication—hallmarks of a capstone-type project.

Directions: Reflect on your lesson delivery and learners' performance through the following questions. These will help you evaluate the effectiveness of your strategies and identify areas for improvement:

- 1. How many students scored at least 80% on the assessment, and how many require remediation?
- 2. Which of my teaching strategies were most effective?
- 3. What challenges did I encounter during the lesson delivery, and how did I address them?

In preparing this Lesson Exemplar (LE), the writer used a rubric generator to ensure that the assessment component is clear, objective, and aligned with the learning outcomes. A citation generator was also utilized to maintain proper referencing standards. In addition, an AI tool was used to generate sample texts that teachers may use. The writer reviewed and finalized the writing of the content. The writer takes full responsibility for the content of the LE.

Appendix 1: Copy of the Situations for Option C (To Summarize or Not?)

No	Situation/Text	Need to Summarize?	Reason/Explanation
1	A 5-page article about the effects of climate change on agriculture that you need to present in class for 5 minutes.	__YES __ NO	
2	A one-sentence definition of photosynthesis from a textbook.	__YES __ NO	
3	A news report about a recent government program that you must include in your research paper.	__YES __ NO	
4	A poem that you are asked to analyze for its meaning and imagery.	__YES __ NO	
5	A 10-minute video explaining how artificial intelligence works, which you need to explain to your classmates.	__YES __ NO	
6	A social media post that says, "No classes tomorrow due to heavy rain."	__YES __ NO	
7	A chapter from a novel that you must discuss in a literature class.	__YES __ NO	
8	A short list of instructions for logging into an online learning platform.	__YES __ NO	
9	A research study that's 20 pages long, and you're writing a related review paper.	__YES __ NO	
10	A slogan that says, "Reduce, Reuse, Recycle."	__YES __ NO	

Appendix 2:

TEXT

Photosynthesis is the process by which green plants, algae, and some bacteria use sunlight to produce their own food. During this process, they take in carbon dioxide from the air and water from the soil, and with the help of sunlight, they create glucose (a type of sugar) and release oxygen. This natural process is important not only because it provides food for plants, but also because it helps balance the amount of carbon dioxide in the atmosphere.

When animals eat plants, or when plants die and decay, the carbon stored in their bodies returns to the environment, continuing the carbon cycle. However, human activities such as cutting down forests and burning fossil fuels add more carbon dioxide to the air than nature can handle. This imbalance contributes to global warming and climate change.

POOR SUMMARY

Photosynthesis is when plants make their own food using sunlight. It helps the environment and people affect it by cutting trees and using fuel.

Why it's:

- Too short and lacks key information.
- Does not explain how photosynthesis connects to the carbon cycle.
- Uses vague language ("helps the environment") instead of specific ideas.

GOOD SUMMARY

Photosynthesis enables plants, algae, and some bacteria to make food by using sunlight, carbon dioxide, and water. It is an essential part of the carbon cycle because it reduces the amount of carbon dioxide in the atmosphere and helps regulate Earth's temperature. When plants and animals die, carbon is released back into the environment. Human activities like deforestation and burning fossil fuels increase carbon dioxide levels, disrupting this balance and contributing to climate change.

Why it's GOOD:

- Captures all the main ideas in clear and concise sentences.
- Explains cause and effect between photosynthesis and climate change.
- Uses academic yet understandable language suitable for Senior High School students.

HOW THE ENVIRONMENT IMPACTS OUR HEALTH

People are exposed to risk factors in their homes, work places and communities through:

AIR POLLUTION
including indoors and outdoors

INADEQUATE WATER, SANITATION
and hygiene

CHEMICALS
and biological agents

RADIATION
ultraviolet and ionizing

COMMUNITY NOISE

OCCUPATIONAL RISKS

CLIMATE CHANGE

BUILT ENVIRONMENTS
including housing and roads

AGRICULTURAL PRACTICES
including pesticide-use, waste-water reuse

World Health
Organization

#EnvironmentalHealth

Appendix 4: Option B: Guided Notes/Graphic Organizer

NOTE TEMPLATE

Names:
Grade and Section:

Date:
Group No.:

SUMMARIZING TIPS:

Use these as a guide when taking notes or retelling information.

1. Identify main ideas and key details.
2. Use your own words – don't copy word-for-word.
3. Eliminate unnecessary examples or repetitive info.
4. Use sequence words (first, then, next, finally) for process/explanation texts.
5. Include only the "big picture". What is the text really about?
6. Try the 5W and 1H strategy. Who? What? When? Where? Why? and How?

VOCABULARY STRATEGIES

Word	Guess the meaning	Clue from the Context	Dictionary/Confirmed Meaning

STRATEGIES:

1. Use context clues (synonyms, definitions, and examples in the sentence).
2. Break down the word (prefix, root, suffix).
3. Compare with a known word.
4. Use a digital or physical dictionary.
5. Create a visual or use the word in a sentence.

COLLABORATION ROLES

Assign each member a role to promote equal participation.

1. Leader: Keeps the group on task and manages time
2. Recorder: Writes and notes the summary
3. Vocabulary Master: Tracks difficult words and leads discussion
4. Checker/Editor: Reviews accuracy and makes corrections
5. Presenter: Shares findings with the class

Appendix 5: Option C: Interactive Mini-Lecture

LECTURE: Collaborative Communication and Summarizing Key Information

Introduction

Good day, everyone. Today, we'll focus on two essential communication skills that are powerful in both academics and the workplace:

- Collaborating in groups
- 2. Summarizing key information

These two skills will help you organize your ideas, communicate effectively, and work well with others.

Ask the class:

- Have you ever worked on a group project that did not go as planned? What went wrong?
- What makes someone a good team member?

Part 1: What is Collaborative Communication?

Collaborative communication means working together to share ideas, solve problems, and complete a task. It is not just about talking—it is about listening, organizing ideas, and helping each other succeed.

Key Features:

- Active Listening
- Turn-Taking
- Clarifying and Asking Questions
- Group Decision-Making
- Assigning Group Roles

Example: In a group project, one student researches, another summarizes, one creates a visual, and another presents.

Ask:

- What role do you usually take in group tasks?
- What communication habits do you want to improve?

Part 2: What is Summarizing?

Summarizing means expressing the main points of a text or discussion in your own words, briefly and clearly. Summaries help your audience quickly understand the key message.

Good Summaries Should:

- Focus on main ideas only
- Be shorter than the original text
- Use your own words
- Use clear and accurate vocabulary
- May include visuals

Example:

Original: “The Department of Health reported a 20% increase in dengue cases in 2023, mostly affecting urban areas with stagnant water sources.”

Summary: “Dengue cases rose by 20% in 2023, mainly in urban areas with stagnant water.”

Student Reflection Activity

Ask students to answer in writing or in pairs:

1. Which summarizing strategy do you find easiest or hardest? Why?
2. What new insights did you gain about team communication?
3. How can these strategies help your group perform better in your upcoming presentation?

Part 3: Why These Skills Matter

In school:

- Summarize information in reports or during presentations
- Work in groups for science, TLE, or English projects

In work:

- Summarize meetings, co-write proposals, create reports
- Communicate clearly with teammates, customers, or clients

Ask:

- Can you think of a job or task where summarizing and collaboration are required?
- What happens if a team does not communicate well?

Part 4: Strategies You Can Use**Vocabulary Strategies:**

- Use context clues
- Break words into prefixes/suffixes
- Keep a personal word list or glossary

Summarizing Steps:

1. Read/listen carefully
2. Identify key points
3. Paraphrase in your own words
4. Organize logically
5. Use visuals if helpful

Collaboration Tips:

- Assign clear roles
- Set deadlines and goals
- Practice and give respectful feedback
- Be open to different ideas

Ask:

- Which of these strategies have you used before?
- Which one do you want to try with your group this week?

Conclusion

To wrap up: Today, we explored how to summarize key information and how to collaborate effectively. You will soon apply these skills in your group presentation task, where your team will summarize a

short academic or technical text and present it using slides or infographics. Then, you will give and receive structured peer feedback.

Final Reminder:

- Use accurate and appropriate vocabulary.
- Listen, collaborate, and reflect.
- Support your group and be open to feedback.

Ask:

- What is one takeaway from today's lesson?
- How will you contribute to your group's success in the presentation?

Appendix 6: Option A: Jigsaw Reading

Jigsaw Reading Text: Building Effective Group Communication

Segment A: Understanding Group Roles

In every effective group, each member plays a specific role that contributes to the success of the task. Common roles include the leader, who guides discussion and keeps the team on track; the timekeeper, who ensures the group follows the schedule; the recorder, who takes notes and organizes key points; and the presenter, who shares the group's output. Assigning roles helps distribute responsibilities and encourages full participation. When members understand their roles, they become more accountable and collaborative.

Segment B: The Importance of Active Listening

Active listening is more than just hearing words. It's about fully concentrating on what is being said. Group members who listen actively show respect and build trust. They make eye contact, ask clarifying questions, and avoid interrupting. This kind of listening reduces misunderstandings and improves decision-making. It also helps quieter members feel heard and valued, making group communication more inclusive and productive.

Segment C: Giving and Receiving Feedback

Constructive feedback is a powerful tool for learning and improvement. In group settings, members should give feedback that is specific, respectful, and focused on the task, not the person. Using phrases like "I noticed..." or "You could try..." can make feedback less personal and more helpful. Receiving feedback also requires openness and willingness to improve. Feedback, when done well, strengthens group output and builds professional communication habits.

Segment D: Visual and Multimodal Communication

In technical and academic presentations, visuals like charts, diagrams, and infographics help clarify complex ideas. They support verbal explanations and make information easier to understand. Using multimodal communication, combining text, visuals, and spoken words, engages audiences more effectively. Groups that plan how to use visuals during their presentations often appear more prepared and professional. However, visuals must be accurate, clear, and relevant to the message.

Appendix 7: Sample Text for the Performance Task: Summarize and Present (Making Technical Texts Clear)

“The Impact of Social Media on Human Communication”

Social media has changed the way people communicate in today’s world. Platforms such as Facebook, X (formerly Twitter), Instagram, and TikTok allow users to share information instantly with others, regardless of distance. This has made communication faster and more convenient, especially for connecting with friends, family, and people across the globe.

However, the constant use of social media also has drawbacks. Many users tend to rely on short messages, emojis, and images rather than face-to-face conversations. As a result, some people may struggle with expressing emotions or building deep personal relationships. Moreover, the spread of misinformation and cyberbullying has become a growing concern.

Despite these issues, social media continues to be a powerful tool for education, advocacy, and creativity. It allows individuals and organizations to raise awareness, promote causes, and share knowledge with a wide audience. The challenge for users today is to use these platforms responsibly and critically while maintaining meaningful real-world connections.

Appendix 8: Rubric for the Performance Task: Summarize and Present (Making Technical Texts Clear)

Criteria	4 – Excellent	3 – Proficient	2 – Developing	1 – Beginning
Collaboration & Teamwork	Roles clearly assigned; equal participation	Most members contribute; some roles are assigned	Uneven participation; unclear roles	One or two members dominate; minimal collaboration
Summary Quality	Clear, concise, well-organized; main ideas complete	Mostly clear; captures most main ideas	Some main ideas are missing or unclear	Incomplete or confusing summary
Use of Visual Aid	Effective, relevant, and enhances understanding	Clear and relevant, but could be more engaging	Minimal visuals or confusing layout	No visuals or not connected to content
Vocabulary Use	Technical terms used accurately and effectively	Most terms are used correctly	Some incorrect or unclear vocabulary	Little to no use of appropriate vocabulary
Presentation Skills	Confident delivery; clear voice and visuals	Mostly clear delivery; good use of visuals	Some reading; visuals not explained well	Weak delivery; reading word-for-word or unclear visuals
Peer Feedback Participation	Gave and received thoughtful, respectful feedback	Participated in feedback, some relevant points	Gave/received minimal or vague feedback	No meaningful participation in feedback
Score Range: 24 – Excellent 18–23 – Proficient 12–17 – Developing Below 12 – Beginning				

Appendix 9: Peer Feedback Form: Collaborative Summary Presentation

Directions: Observe another group's presentation. Then provide respectful, specific feedback using the prompts below. Circle or check the rating and write your comments.

Group Number or Names: _____

Name of Evaluator: _____

Peer Evaluation Checklist

Criteria	Yes	Somewhat	Not Yet
The group summarized the main ideas clearly.			
The visual aid was informative and relevant.			
The group used appropriate technical vocabulary.			
All members participated in the presentation.			
The group explained their summary and visuals clearly.			

What did the group do well?

What can the group improve on?
